LABOUR GAZETTE

Started in 1921, the *Labour Gazette*, issued monthly, is a journal for the of all interested in obtaining prompt and accurate information on m specially affecting labour in India and abroad. It contains statistical other information on consumer price index numbers for working class, indutrial disputes, absenteeism, trade unions, industrial relations, cases labour laws, glimpses of industrial awards, labour legislation, etc. articles embodying results of enquiries and research relating to wages, how of work, unemployment, family budgets, etc., are published from time to tim

Annual subscription for the year Sept. 1970—Aug. 1971 is being accepted Rs. 12.

All amounts are payable in advance in Bombay, in full, either by M. or Cheques/Drafts drawn on Bombay Banks.

ALL CORRESPONDENCE AND REMITTANCES SHOULD ADDRESSED TO:

The Commissioner of Labour and Director of Employment, "Commerce Centre", Tardeo, Bombay-34 : WB (India).

The Month in Brief

consumer Price Index Numbers for Working Class

The Bombay, Sholapur and Nagpur Consumer Price Index Numbers for Working Class for the month of August 1970, with the average prices for the ended December 1960 equal to 100 were 181, 183 and 187 respectively. Jalgaon, Nanded, Poona and Aurangabad Consumer Price Index Numbers Working Class for the month of August 1970, with the average prices for year ended December 1961 equal to 100 were 186, 192, 169 and 184 respectively.

Industrial Disputes

During June 1970, there were 65 strikes involving 14,719 workmen and a time loss of 147,989 working days, as compared to 64 disputes in May 1970 involving 14,486 workers and time loss of 127,978 mandays. Further particulars of industrial disputes are given at pages 236 to 237 and 264 to 269 of this issue.

Absenteeism

Phone Sec.

287

During July 1970, the average absenteeism in the textile industry in seven important textile centres in the State viz. Bombay City, Nagpur, Sholapur, Jalgaon, Nanded, Akola and Aurangabad amounted to 19.66 per cent as against 23.34 per cent in June 1970. For further particulars see page 239 of this issue.

Production of Cotton Yarn Spun and Manufacture of Cloth

During April 1970, Mills in Bombay City produced a total of 14,696,000 Kgs of yarn, 264,000 Kgs of Miscellaneous goods such as blankets, hosiery goods and knitted fabrics and packed 123,000 metres of cotton goods mixed with silk, wool, terene etc. and packed 99,176,000 wearable and non-wearable cloth and those kgs. in best of Maharashtra produced 4,443,000 Kgs of yarn 125,000 Kgs of miscellaneous goods such as blankets, hosiery and knitted fabrics and packed 26,044,000 metres of wearable and non-wearable cloth. The total production of cotton yarn, miscellaneous goods and mixed with silk wool, terene etc. packing of wearable and non-wearable cloth for the whole State of Maharashtra amounted to 19,139,000 Kgs., 389,000 Kgs. and 123,000 metres and 125,220,000 metres respectively.

Current Notes

Central Committee of Employment Reconstituted

The Government of India have reconstituted the Central Committee of Employment. The Union Minister of Labour and Rehabilitation Shri D. Sanjiyayya will be Chairman of the 48-member committee. It advise the Ministry of Labour and Employment on problems relating h enployment, creation of employment opportunities and working of the National Employment Service.

*Besides the chairman, the committee includes two members of the Lok Sabha (Shri Ram Dhan and Shri A. Durairasu) and two from the Rajya Sabha (Shri Sawai Singh Sisodia and Shri Manoranjan Roy). A representative from each of the States, Union Territories, Central Trade Union Organisations (INTUC, AITUC and HMS), Employers' Organisations. (Employers' Federa, tion of India, All India Organisation of employers and All India Manufacturers' Organisation), All India Khadi and Village Industries Commission, Small Scale Industries Board and All India Women's Conference are also among members of the committee.

The following are the other members : Dr. Baljit Singh, Professor of Econo. Professor V. S. Vyas of Sardar Patel University, Gujarat. mics, Lucknow University, Lucknow; Dr. Gautam Mathur, Department of Economics, Osmania University, Hyderabad; Director, Institute of Applied Man-power Research, New Delhi; Joint Secretary to the Government of India and Director of Man-power, Ministry of Home Affairs, New Delhi and the Director-General of Employment and Training, Ministry of Labour and Rehabilitation, New Delhi.

Proposals soon for Industrial Relations Legislation in Great Britain

The British Government's proposals for industrial relations legislation will probably be made public in near future.

The Prime Minister, Mr. Edward Heath, told representatives of the Confederation of British Industry (CBI) on 8th September 1970 that a ' consultative document " containing their proposals would then be comple-

On the basis of this document, the Secretary of State for Employment and Productivity, Mr. Robert Carr, would enter into discussion with the trade unions, CBI and other bodies.

Mr, Heath reiterated his Government's determination to stand by their economic policies—to expand the economy; improve living standards through higher real earnings; secure reductions in costs; and achieve higher invest-

He however emphasised that there was no question of " Crash action" which might achieve some immediate improvement but create future pressures. The intention was still to secure lasting solutions.

LABOUR GAZETTE-OCTOBER 1970

In Mr. Heath's view, the greatest single encouragement to higher investment and productivity would be a steady and sustained expansion of demand.

The review of public expenditure initiated by the Government would be continuing process aimed at establishing a proper order or priorities and assuring that Government expenditure was concentrated where it could et the best value.

cambridge Conference to discuss Employment prospects in : Indian delegates to attend

Ninety representatives from more than 40 countries (including India) and international organisations attended a conference on "Prospects for mployment opportunities in the 1970" at Cambridge from September 14 to 24.

Indian representatives included in the provisional list of conference members are Mr. B. D. Jayal, Minister (Economic) at the Indian High Commission in London; Professor S. S. Khera, of the Institute of Commonwealth Studies, London University; Mr. Pitambar Pant, Member of the Planning Commission, New Delhi; Dr. K. N. Raj, Vice-Chancellor of Delhi University; and

PARTICIPANTS

The Conference, held at Jesus College was sponsored by the Cambridge overseas Studies Committee at the request of the British Ministry of Overseas Development. Among the participants were Ministers, senior officials and academics. Representatives from ILO, FAO, OECD, UNESCO, the World Bank, the Inter-American Development Bank and the private sector also attended.

Development countries represented at the conference included Britain, the United States, Japan, Australia, Canada, Federal Germany and the Netherlands. some 30 developing countries — from Asia and the Far East Africa and the Pacific were represented.

The conference was opened by Sir Geoffrey Wilson, Permanent Secretary to the Ministry of Overseas Development. Mr. David A. Morse, former Director General of the International Labour Office in Geneva, represented the key opening paper, entitled " Dimensions of the employment problem ".

Collective Bargaining Key to cost inflation Problem- Minister exchanges riews with employers

The main responsibility for bringing the current rate of cost inflation in Britain under control rested with those engaged in collective bargaining, Mr. Robert Carr, Secretary of State for Employment and Productivity, told British employers on 11th September 1970.

Expansionary policies, he said, could not bridge the present large gap bewteen the rise in earnings and the rise in productivity.

140

Mr. Carr was meeting heads of leading private companies and employers organisations at the headquarters of the Confederation of British Induce for an exchange of views on the economic situation, with particular refere of to cost inflation, which he singled out as the crucial immediate economproblem.

NO WAGE FREEZE

Mr. Carr stressed that the Government had no intention of reimposition any statutory incomes policy or of calling for a wage freeze. Nor, he adden did recent experience suggest that it would be helpful to lay down norm or detailed criteria for pay increases.

All employers, including the Government, must accept responsibility on negotiating less inflationary wage settlements, and by this and every other means keep price increases to a minimum, said Mr. Carr.

The Minister said the Government intended to take a firm yet fair lire in negotiations with its own employees and to encourage other employers in the public sector to do the same. It expected private employers to adopt a similar instance.

Employment Problem in the Developing Countries Mr. David Morse speaks at Cambridge conference

Mr. David A. Morse, former Director General of the International Labour Office, on 14th September 1970 called for the "dethronement" of gross national product (GNP) as the goal for planning and the measure of performance in development.

He was speaking at a conference in Cambridge on "Prospects for employment opportunities in the 1970s". The conference, which was sponsored by the Cambridge Overseas Studies Committee at the request of the British Ministry of Overseas Development, was attended by more than 140 delegate from 40 countries (including India) and international organisations. It was opened on 14-9-70 by Sir Geoffrey Wilson, Permanent Secretary to the Ministry of Overseas Development.

OBJECT OF DEVELOPMENT

"The object of development", Mr. Morse said, " is not simply to increase the national income, but to ensure that such increases as are achieved really do lead to improvements in standards of living of the vast numbers of people at the bottom of the income distribution pyramid.

"It should now be clear that these improvements will not come aborspontaneously, at least not in the time-span of any social planning or policyt making that is politically acceptable. But it does imply that true progress depends on other factors besides growth of GNP, that economic growth is

LABOUR GAZETTE- OCTOBER 1970

in itself the cure for many of the major bills besetting society, and that there are other criteria of performance and progress on which planners and policy-makers must set their sights if development is to lead, as it must lead, to higher standards of living and a more hopeful future for the dispossessed masses of the world's population."

POPULATION EXPLOSION

proceeding, Mr. Morse said : "In the developing countries of Asia, Africa and Latin America, the tragic waste of human potential for development and the appalling degree of human misery which are associated with the words 'unemployment' or 'underemployment' are caused not so much by fluctuations in the levels of economic activity as by the underdeveloped structure of the economy, coupled with a population explosion of a totally unprecedented magnitude.

During the decade of the 1970s, an increase in the labour force in developing countries of about 225 million people may be expected. This would mean that to absorb both the projected increase in the labour force and the existing visible surplus of labour supply, around 300 million jobs would have to be created in developing countries between now and 1980.

The experience of the first Development Decade, however, has shown that in developing countries an automatic mechanism linking increases in production to increases in employment, let alone anything approaching full employment, simply does not exist.

"The UN Committee for Development Planning has remarked that although the annual rates of growth recorded in developing countries during the 1960s have in general been modest, they have often marked a break from the stagnation and inertia characteristic of the decades preceding the second World War, but these encouraging achievements have not been accompanied by a corresponding increase in the welfare of the masses of the population; on the contrary, in some countries relatively high rates of economic growth were actually accompanied by a decrease in levels of employment."

This has meant that large—and growing—numbers of the population have been completely by passed by development, with no opportunities either to contribute to it or to benefit from it.

" If, therefore, we dethrone GNP from its position as the alpha and omega of development, even if we give employment objectives quite as much weight in development policies and planning as rates of economic growth, we still will only have begun our search for patterns of development that will guarantee all people in the decades to come at least those adequate and decent standards of living —including proper medical care, nutrition, education and housing which must remain the goal and the purpose of development."

Among the topics being discussed at the 10-day conference were the need to stimulate means of population control, to find work for young people on the threshold of life who have most to contribute, and to place the creation of employment alongside GNP.

COLLECTIVE BARGAINING

BY

SYED WAHID ALI*

The phase "Collective Bargaining" was coined by the famous British Social inker Mr. Sydney Webb. It has been defined in the Encyclopaedia of ocial Sciences as a "process of discussions and negotiations between two rties one or both of whom is a group of persons acting in concert". This is wider sense of the term applicable to all agreements resulting out of bargain ween parties in all walks of life. In its restricted sense, however, it is procedure by which an employer or employers and a group of employees ree upon the conditions of work.". A more comprehensive and self-explanary definition is given in an I.L.O. publication entitled "Collective Bargaing-A Workers' Education Manual". It is defined as " negotiations about e working conditions and terms of employment between an employer, a oup of employers or one or more employers organisations on the one hand nd one or more representative workers organisations on the other hand with view to reach an agreement."

From the above definition, it is clear that Collective Bargaining has three, sential ingredients viz. :--

1. Parties to the agreement.

2. Subject matter of agreement and

3. Objects of the agreement.

These aspects are discussed in details in the following Paras.

(A) Parties to the Agreement.—As in any other contract, for collective bargaining also two parties are necessary. As far as employers are concerned a single employer can also be a party to collective bargaining. In fact in most of the agreements a single employer is a party and the other side is always a union. In such cases bargaining is collective only on the workers side. Bargaining can also be with a group of employers. For instance when employers engaged in similar trades join forces and adopt a common policy, bargaining takes place between two collective parties. Such cases are not rare now-a-days. In industrially advanced countries where strong trade unions exist, the employers in the same trade unite and form their own associations. The main object of such association is to maintain equal and matching bargaining strength with the equally strong trade union. Bargaining between such groups of employers and union is collective on both the

"Shri Syed Wahid Ali, B.A., LL.M. (Osmania), D.S.W. (Calcutta), is Assistant Commisgioner of Labour, Bombay.

144

Bargaining in the case of workers is always done by a body which acte a contracting party. Unlike employers an individual worker cannot be a party to a collective bargaining. Thus in respect of workers bargaining is alw collective. When we say a body of workers we mean a group of worker organised and called trade union. Trade Unions can be formed where freede of association is guaranteed. Freedom of association is therefore, a quanon for collective bargaining. However mere freedom of association not enough unless the unions are free and independent. In collective bares ing only a truely representative union can act as a bargaining agent on beh. of the workers. Management sponsored unions or unions patronised by n employers known as " yellow unions " are not free and independent unions and therefore are not truch representative unions to bargain on behalf of worker The other conditions necessary for effective bargaining is the recognition unions. In the early stages of trade union movement the employers used to look upon unions with suspicion and distruct. They used to prefer havin talks with workers as individuals and refused to accept the unions their bargaining agents. In advanced countries this stage of suspicion of distrust is over and employers have realised that unions have come to stay Even then, in many of the industrially advanced countries where collective bargaining has been established as a regular method of settling industrial disputes, various systems of recognition of unions as representative recognised unions have been adopted.

In Canada the Labour Relations Boards set up under the Disputes Investigations Act, 1948, have powers to certify organisations as exclusive agents of employees for the purposes of collective bargaining. In U.S.A. the representative character of a union is determined by Government officials in accordance with the National Labour Relations Act. In Australia and New Zealand only a union registered by an Arbitration Court can appear before such courts to submit its claim in disputes arising out of collective bargaining.

In India, recognition of a union is not a simple problem. Multiplicity of Unions organised on the basis of political ideologies makes the problem more complex. In 1947 an attempt was made to introduce the system of compulor recognition of unions by amending the Indian Trade Unions Act, 1923. This could not however materialise and the amendment lapsed. Thus there is still no Central legislation on the subject of recognition. In some States like Maharashtra. Gujarat, M.P. and Rajasthan there are laws which provide for compulsory recognition. Under these local enactments, the question of recognition is restricted to such areas and to such industries where and to whom these enactments are applicable. In a country like India where workers are not properly organised and where much depends upon the attitude of the employer, the case for compulsory recognition is much more strong. The Royal Commission of Labour had long ago cautioned the employers that "existence of two or more rival unions is not in itself a sufficient ground for refusing to recognise any or all of them. The combination of all employees with common interest for a single union is conveniently desirable in their own interest but this is a matter for them (workers) and not for the employers." It is obvious that unity amongst workers is a greatest source which brings them recognition. In the words of Shri V. V. Giri, " the workers must

LABOUR GAZETTE-OCTOBER 1970

realise that recognition is not a favour to be sought by them or a patronage to be extended to them by the employers. If any union in an industry or an thereof is strong enough in membership, and is in a position to prove that it has sanctions and further is able to achieve reasonable and just conditions for workers by negotiations, through democratic trade union principles, recognition in such cases by the employer should be automatic. "

The National Commission on Labour has also favoured compulsory recognition under a central law. It could not however, make a clear recommendation either in favour of verification of member hip records or holding a secret ballot as a method of ascertaining the majority character of the union claiming recognition. The feelings in support of and against the secret ballot are so strong that a body of the status of the National Commission also could not come to a firm conclusion and the controversy still remains unresolved. In Maharashtra where the provisions of the Bombay Industrial Relations Act, 1946 are already in force in respect of certain specified industries, a lead has again been taken to introduce a legislation on the subject of unfair labour practices and recognition of unions. The Bill makes a provision for recognition of a single majority union as a sole bargaining agent in the undertakings which for the time being employ hundred or more persons. It would be a pioneering step in the right direction in respect of compulsory recognition of unions by employers when the bill is enacted into Law.

Subject-matter of Collective Bargaining

The subjects discussed in collective negotiations and included in collective agreements cover all matters relating to working conditions and terms of employment. In some countries the subject matters are determined solely by the parties themselves and in some others the law of the country specifies certain subjects which should be covered necessarily by agreements. Denmark, Germany, Italy, Norway, Sweden, Switzerland, U.K., U.S.A. are among the countries where the subject-matters of collective bargaining are left entirely to the decision of the parties. It is however, necessary in these countries that no agreement should provide for conditions of employment contrary to law or below the standards laid down by law. In France, and some Latin American countries the subject matters are specified by law. Whether the parties are free to select the matter or whether the matters are provided by law, the broad categories, under which the terms of agreement fall are as under :---

- (a) Those which sets standards of employment.
- (b) Those which regulate the relations between the parties.

In the first category the following are the matters generally covered :--

- (1) Wages and other allowances including profit sharing.
- (2) Hours of work and rest intervals.
- (3) Leave facilities.
- (4) Seniority and promotions.
- (5) Annual Holidays with pay.
- (6) Discharges and dismissals.
- (7) Retirement benefits.

and other like matters which are directly applicable to the relations between an individual employer and a worker.

In the second category the following matters are covered which relate to the relations between the bargaining parties viz. the *employers and the unions*

(1) Procedure for joint consultation.

(2) Method and procedure of settling disputes and differences over interpretation of agreements.

(3) Prohibition of strikes and lockouts during the period covered by the agreement.

(4) Duration of the agreement.

(5) Procedure for negotiating new agreements.

It is usually the questions relating to wages and allowances which in majority of the cases are the subject matters of collective bargaining.

(C) Object of collective bargaining

The sole object of resorting to collective bargaining is to settle disputes by mutual negotiations. This is a method of maintaining peace and harmony in industrial relations. In collective bargaining much reliance is put on direct negotiations instead of looking forward for external interference. The right of workers to strike and the right of employers to lockout is implied in collective bargaining. These rights of both the parties are regarded as essential safe-guards for freedom of collective bargaining. As the alternative to collective bargaining is eitner a strike or a lockout it is imperative on the parties to collective bargaining to be sincere in their respective stands and both should make genuine efforts to reach settlement. Collective bargaining demands from the unions that they would not put up exaggirated claims upon the industry and it equally requires from the employers that they would accommodate the reasonable claims of the unions without making it a prestige issue. The spirit of "give and take" and co-operation is therefore, necessary in collective bargaining.

Thus, the main object of collective bargaining is to make sincere efforts to settle genuine disputes with direct mutual negotiations and discussions without inviting the interference from any outside agency.

DISTINCTION BETWEEN COLLECTIVE BARGAINING AND CONSULTATION AND CO-OPERATION AT THE LEVEL OF UNDERTAKING

Collective bargaining is to be distinguished from consultation and co-operation at the plant level. Discussions in Works Committees and production Committees, between the representatives of the employers and workers, in individual factories have some features resembling to collective bargaining. The two processes are, however fundamentally different. In Collective Bargaining the object is to reach agreement on vital issues like wages, allowances and other terms of employment which form part of a contract of employment. Here the parties to the bargain start with divergent view point but try to reach

LABOUR GAZETTE--OCTOBER 1970

compromise by negotiations. When the bargain succeeds the terms of agreement are put to effect. In consultation and co-operation the task is usually to exchange information and consider suggestions for improving less vital issues like safety health welfare etc. There is however no bar on considering grievances and other vital issues but usually such matters are kept outside the purview of consultation at the plant level and usually discussions take place on matters of common interest about which exchange of views is mutually advantageous. The outcome of such discussions in the consultative bodies like works committees and production committees take the form of recommendations on which the final decision is left to the management. It could thus be seen that though consultation and co-operation at plant level resemble to collective bargaining, the main difference lies in the approach and in the final outcome. In consultation the emphasis is on co-operation on matters of common interests, whereas in collective bargaining it is on "reconciliation of divergent interests and demands "

Collective Bargaining and India

At present in many of the industrially advanced countries collective bargaining is practised as a regular method of settling disputes. According to one I. L. O. report the conditions of work of one-third of the non-agricultural labour force in U. S. A. are determined through Collective bargaining. In Switzerland about half of the nation's labour force is benefited by collective agreements. The working conditions of about half of the industrial workers are also fixed through collective bargaining in Australia, Belguim Federal Republic of Germany, Luxembourg, Scandinavian countries and U. K. In the Soviet Union and other Eastern European democracies collectives contracts at the level of the undertaking extend to the vast majority of the workers.

As stated earlier, collective bargaining could not make much head way in India. The reasons are obvious. Trade Unions in real sense came into being in India after the 1st world war. Because of the ignorance and illiteracy of the Indian working class, the union leadership is very often in the hands of outsiders who are politically influenced. This has led to the formation of labour organisations on political grounds. Multiplicity of political parties in the country also reflected in more than one trade union organisation resulting in inter-union rivalries. Lack of solidarity and unity in the working class weakens their bargaining strength. This informity in the trade union movement of India is also responsible to a greater extent for the slow progress of collective bargaining.

The recent changes in the attitude of the workers and the employers manifested in the agreements recently concluded are however encouraging. No account of the history of collective bargaining in India would however be complete if no mention is made of the Bombay Industrial Relations Act, 1946. This is the first important piece of legislation on industrial relations in India which provided for compulsory recognition of unions. The Act makes it necessary to register unions as representative unions on the principle of one union in one industry in a given local area. Such a representative union has a legal right to enter into an agreement with the employers in the Industry and no employer can bring about any change in the working conditions except with

the consent of the representative union. In case of failure to arrive at any settlement by direct negotiation, the parties submit to conciliation. The working of the Act since past several years has established that in majority of the cases disputes are settled amicably by mutual negotiations. The Bombay Industrial Relations Act, 1946 is thus the first legislation which has encouragecollective bargaining.

The Industrial Disputes Act, 1947 was amended in 1956 and one new clause "P' was added in section 2 of the Act. It defines " settlement " to include a written agreement between the employer and workmen arrived at otherwise. than in the course of conciliation proceedings. With this amendment, agree, ments reached as a result of direct negotiations between the parties outside conciliation have been given legal status like settlements arrived at in concilia tion. This has encouraged the parties to enter into direct talks and settle i disputes by collective bargaining. Such types of agreements are increasing day by day. The addition of section 9A in the Act requiring employers t give a notice of change to workers before actually effecting any change i working conditions has also encouraged direct negotiations which are nothing but collective bargaining. The Act, however, requires radical changes if it to recognise collective bargaining as a method of settlement of industrial di putes. Compulsory adjudication is still the main basis of this Act and the above two amendments are only the beginning to achieve the goal of collective bargaining. The usefullness of collective bargaining is accepted by one and all but there is a consensus of opinion that the time is not yet ripe in India to eliminate compulsory adjudication altogether.

Shrt V. V. Giri in one of his speeches delivered in the early 60s had maintained that "time to embark on a scheme of settlement of disputes based solely on mutual negotiations, to the exclusion of compulsory adjudication has not yet come. The starting of a new experiment at this juncture which may lead to an increase in industrial strife, even if it be temporary, might become inconsistent with the successful implementation of the Five Year Plans to which we are all pledged." He was also of the view that "while every efforts should be made to encourage collective bargaining and mutual settlement of disputes and gradually to make that process a habit rather than a necessity, nothing should be done to weaken the existing machinery for promoting settlement of disputes in industrial undertakings or to deprive the Government of the discretion that they now have to order reference of disputes to tribunals."

Recently the National Commission on Labour has also examined the problem minutely. It is strange enough that even after a lapse of a decade there has been not much difference between the views expressed by the Commission and the views of Shri V. V. Giri as quoted above.

The Commission while recognising that compulsory adjudication tends to prolong disputes, has maintained that collective bargaining as it has developed in West is not quite suitable for India. In the words of the Commission "it cannot appropriately co-exist with the concept of planned economy where certain specified production targets have to be fulfilled." While admitting the

LABOUR GAZETTE-OCTOBER 1970

149

and of State interference in maintaining industrial peace the commission has recommended that such state regulation must co-exist with collective bargaining. In the considered view of the commission "there is a case for shift in emphasis and this shift will have to be in the direction of an increasingly greater scope of and reliance on collective bargaining." But any sudden change from djudication to collective bargaining is according to the Commission, neither for nor feasible. "The process has to be gradual ", the Commission pined and suggested that "a beginning has to be made in the move towards ollective bargaining by declaring that it will acquire primacy in the procedure settling industrial disputes."

From the above discussions it emerges that collective bargaining is a desirable system for settlement of industrial disputes. There cannot however, be a sudden shift in replacing the present system of adjudication by a system of collective bargaining. In a developing and planned economy, collective bargaining to me total exclusion af adjudication is not desirable. The present system of adjudication and state interference for settlement of industrial dispute is accessary for ensuring fixed targets of production. The role of the State in regulating industrial relations in planned economy is now well recognised. The state cannot be a silent spectator to the spactacle of industrial conflict, since it has vital stakes in the social and economic goals of the nation. Collective bargaining has, therefore, to develop and to co-exist with the present system of state regulation of industrial relations.

STUDY OF FACTORS AFFECTING PRODUCTIVITY IN AN ENGINEERING CONCERN IN BOMBAY

BY

S. B. KARMARKAR*

Introduction

A study was conducted in one of the sections of an engineering concern in Bombay to find out the reasons for stagnancy in productivity. The study was carried out after nearly two years from the introduction of incentive scheme.

Details of Incentive Scheme

The Scheme covers only the productive workmen of the shop. Nearly 350 employees are covered under the scheme. The scheme was introduced after conducting a proper time study for nearly two years. Employees are grouped and incentive is paid on the performance of the group and not on individual performances. Wage incentive is based on group performance index of a certain period (current month preceding one or two month's average) which is worked out as follows :--

| Standard Man hours output of the group during the period | Х | 100 SMH Output 100 |
|---|---|--|
| Actual man hours worked (Against the above output by the group during the same period.) | x | Total input AMH 100 AMH where SMH is not available. Total idle time AMH |

No incentive is paid if the group performance index is 45 per cent, or below. The maximum incentive limit to be paid corresponds to the rate at 134 per cent, performance index. Even if performance Index exceeds 134 per cent, in any month payment rate will correspond to 134 per cent.

The enclosed table gives the group number, average number of persons working in the group and average performance index in the years 65/66, 66/67 and 67/68.

Con rary to expectations, the performance index in the shop under consideration did not show appreciable rise even after the introduction of the incentive scheme.

The stagnancy was studied with reference to a number of variables like supervision, nature of the work group, nature of the job, grievance handling communication, personal characteristics, social background, production technique, etc. Since the study was intended to reveal the forces at work which hampered higher productivity inspite of corresponding monetary advantage, it was necessary to take into account all the abovementioned variables which have the potentialities to influence productivity either way.

LABOUR GAZETTE-OCTOBER 1970

vlethod of Study

interview schedule containing open-ended questions was prepared covering all the abovementioned areas. The Group Leaders were chosen for interviews since they are the first line supervisors. These group leaders are worker-supervisors and are supervising the work of nearly 12 to 15 employees each. These group leaders can play a very important part in increasing the performance index since they are on the shop floor and are in constant touch with workers.

Details of Study

The answers received to different questions can be summarized as follows :---

Question 1.—Do you think that the workers are co-operative?

Answer.—The majority of the group leaders expressed that the workers are co-operative. Only one group leader points out that in his group only 50 per cent. of the employees are co-operative. A small percentage of group leaders felt that in their groups there are one or two individuals who are hampering the increased production. These group leaders feel that strict action should be taken against the minor bad elements which are setting a bad example for other willing workers.

Question 2.—Do they require constant supervision?

Answer.—Fifty per cent. of the group leaders expressed the opinion that constant supervision on the workers working under them is not required. Only two group leaders were of the opinion that constant supervision is required. The rest of the answers can be grouped as follows :--

(a) 40 per cent. constant supervision is required.

- (b) Only in initial stage supervision is required.
- (c) Sometimes drawings required more explanation.

(d) One or two employees in the group requires constant supervision.

Question 3.—Do they take genuine interest in the work? If not what are the teasons?

Answer.--Varied and divergent opinions were expressed. Only four groups leaders pointed out that most of the workmen working under them take genuine interest in the work. The other three group leaders thought that mostly workmen working under them take interest but when they see that workmen from other groups are wasting their time, these workmen try to follow them

The other views can be grouped as follows :---

(a) Workmen who do not take interest believe that no one can take any action against them.

(b) Workmen feel that they are not properly designated and hence they do not take interest in work.

(c) Some of the workmen do not take interest as they are frustrated.

(d) Workmen have a feeling that injustice is done to them and that they are neglected.

(e) 3 Group leaders refused to reply to this question on the ground that they can't express any opinion on this point.

R 4735—2

Question 4.—Do they properly understand the instructions? If not, where efforts are made to get clear understanding?

Answer.—The majority of the group leaders felt that instructions given to the workmen are properly understood. A few cases of individuals who do not understand any instructions were reported. One interesting point was raised by one of the group leaders namely that no one working under him : prepared to accept his instructions. He had reported the matter to the superior but however, no action has been taken till date. A majority of the group leaders take special pains to see that instructions are followed. Only the group leader reported that the workmen working under him are of so low calibre that any amount of explanation is of no use. This group leader has lost complete hope of educating some employees to understand the instructions and read blue prints.

Question 5.—Are the workers satisfied and contented in general?

Majority of the group leaders were of the opinion that generally workers working under them are satisfied. Minor cases of discontent were mentioned as follows :---

(a) Payment not proper.

152

(b) No proper designation and wages.

(c) Skill of the employees is not considered.

(d) Neglected by superiors.

Question 6.—Are they rude or aggressive ? What efforts are made to change their attitudes.

Answer.—Majority of the group leaders expressed that workmen working under them are not rude. Only two group leaders found that 20 per cent. of the workmen working under them are rude and difficult to control. Majority of group leaders thought that their attitudes would change by constructive approach from higher officials. One group leader felt that workmen working under him are beyond anybody's control and that proper designations might improve the position.

Question $\overline{7}$.—Do you think age group, status or place of origin has got any influence on efficiency, obedience or discipline, etc. ?

Answer.—Majority of the group leaders have expressed that these factors would not affect productivity much.

Question 8.—What are the usual nature of complaints received from the workers?

The following are the complaints :---

(a) Additional hands required because work is heavy.

(b) Non-availability of tools and material.

In Not paid properly.

(d) Extra increment not received.

(e) No proper designation.

(f) Expect better treatment from superiors

(g) Feeling that work is not appreciated.

(h) Promotion Policy of the Company

Supply of material not regular.

Question 9.—Do you think that you have sufficient number of workmen in $_{\rm pur}$ group ?

Inswer.—The majority of the group leaders feel that they have sufficient upber of workmen in their groups considering the work load.

Question 10.—Do you receive proper instructions from your superiors or matching instructions are given to you?

Answer.—The majority of the group leaders opinioned that the instructions iven to them by their superiors are always clear.

Question 11.—Do you get proper tools and material required for your job $\frac{1}{1}$ you have to waste your time in securing them ?

Answer.—The majority of the group leaders felt that sometime is lost in couring tools. It was pointed out that groups were to be equipped with ols and the matter was discussed on a number of occasions but no action as resulted till this day. Two group leaders mentioned that no time is lost procuring tools. Only one group leader said that much time wasted in curing tools required for the jobs.

Question 12.—What is your opinion regarding the time allotted to your jobs? Answer.—All the group leaders complained regarding time allotted to the bs. The other complaints were like :—

- (a) Wrong timing.
- (b) Lack of proper feeling.
- (c) Insufficient work.
- (d) Change of workmen from one group to another.
- (e) Wrong classification.
- (f) Time lost in seeking classification.
- (g) Defective machines.
- (h) Poor maintenances.
- (1) Dissatisfaction in the gro
- (j) Loss of time in procuring nuts and bolts.

(k) Drawings not clear.

One group leader did not give any information on this point.

Question 13.—What are your suggestions to increase the performance index ich would benefit all the workmen from your group?

The views were as follows :----

- (a) Continuous work.
- (b) Correct time.
- (c) Continuous flow of material and tools.
- (d) Proper job classification.
- (e) No mistakes in drawings.
- (f) Proper atmosphere in the groups.
- (g) Production in-charge and planning in-charge should devote some more time in solving the problems of workmen.
- (h) Better grouping of workmen.
- (i) Disciplinary actions against defaulters

R 4735-24

One group leader suggested that persons who are transferred from his or One group leader suggested that per and he would be in a notific his group and he would be in a notific here would be in

Unions Attitude towards Incentive

nions Attitude towards incentive was that Union when the attitude of the Union towards incentive was that Union when the following grounds. to the Incentive Scheme on the following grounds.

Unemployment in India might increase since future employment is restricted due to the introduction of Incentive.

However, since the workers had accepted the Incentive and payment the manual provides the practically to incentive if following However, since the workers had accepted to incentive if following con-

(1) No warning or charge-sheet is to be given to an employee if his index falls down.

(2) No harrassment from supervisors.

(3) No exploitations.

Conclusions

(a) Defective work grouping was found to be one of the factor which (a) Defective work grouping was round and readers pleaded to better grouping hampered higher productivity. The group leaders pleaded to better grouping was of workmen in order to enhance productivity. Some groups were strong to be a stro of workmen in order to enhance proceedings of workmen from one group to plus workmen. Frequent changes of workmen to different groups where all the and plus workmen Frequent enanges of not known groups where all and factors which affected productivity. It was pointed out that there are no or two which affected productivity. It was pointed to be a first or two workers who stand in the way of higher productivity Group have have suggested stronger disciplinary actions against these bad elements Effectiv disciplinary action should be taken against such employees,

(b) Poor supervisions was found to be another factor which caused in nancy in productivity. One of the supervisors reported that no one workin and an was propared in accept his in muction. Another group has reported that workers working under him were of very low calibre. II was also reported that workers expected better frontment from their superiors.

(c) The management policy in regard to classification, increments, transfer etc. and explained in the workers property which has remarked in a being then a boundfinged increased productivity. Attempts would be required to

(e) the flictent handling of problems commented with Incentive also affected productivity.

p - Tone stendards was also a sugar modulen; 131 - the stincks should be tours sur to pay some mound time and the standard line loss in some took defective machines,

geen maintenance, lask of peopler Colling ere aller affected productivity.

In general we can say that management will as employees can equally be blamed for stagnancy moductivity.

Industries and Labour Department No. BRU 2170/115114/Lab-I, dated 26th August With Whereas by Government Notification, Industries and Labour Department, No. BRU 10 95397/LAB-I, dated the 14th March 1963, the Government of Maharashtra has—

(a) declared under section 3 of the Bombay Relief Undertaking (Special Provisione Act, 1958 (Bom. XCVI of 1958) (hereinafter referred to as "the said Act "), that the indufrial undertaking called "the Pratap Spinning, Weaving and Manufacturing Company Limited. Amalner "to which a loan has been provided by the State Government shall for a period of one year commencing on the 14th March 1963 and ending on the 110 March 1964, be conducted to serve as a measure of unemployment rolief (the said undertaking being hereinafter referred to as the "the said roliof undertaking)" and

(b) directed under section 4 of the said Act that in relation to the said rolief undertaking and in relation to the said period of one year for which that relief, undertaking continues as such, the provisions of sub-section (1) of section 42, clauses (al), (i) (ii) and (iii) of subsection (2) of section 46 and section 98 of the Bomb w Industrial Relations Act, 1946 (Bom XI of 1947) and of Chapter V-A of the Industrial Disputes Act, 1947 (XIV of 1947), shall not apply and the said relief undertaking shall be exempt from those provisions

And whereas from time to time the Government of Muharashtra made declarations directions in relation to the said relief undertaking with a view to extending the period for which the said undertaking shall be conducted to serve as a measure of unemployment relief;

And whereas, by Government Notification, Industries and Labour Department, No. BRU 2170 159106/LAB-(I), dated the 12th March 1970, the Government of Maharashtra-

(a) declared under section 3 of the said Act that the said relief undertaking shall, for a further period of six months commencing on the 14th March 1970 and ending on the 13th September 1970, be conducted to serve as a measure of unemployment relief; and

(b) directed under section 4 of the said Act, that the provisions of,-

(1) sections 35 to 41 (both inclusive), sub-sections (1) and (4) of section 42; sub-sections (1), (3), (4) and (5) and clauses (ai), (i), (u) and (iii) of sub-section (2) of section 46 and section 98 of the Bombay Industrial Relations Act, 1946 (Bom. XI of 1947);

(ii) chapter V-A of the Industrial Disputes Act, 1947 (XIV of 1947); and

(iii) all provisions of the Industrial Employment (Standing Orders) Act, 1946 (XX o 1946), shall not apply to the said relief under aking in relation to the said period of sin months and that the said relief undurtaking shall be exempt from the aforesaid provisions; and further directed that in relation to the said relief under taking and in respect of the period for which the said relief undertaking continues as such under sub-section (2) of section 3 of the said Act, and right, privilege, obligation or liability accrued or incurred before the said relief undertaking was declared to be a relief uncertaking (not being a right, privilege, obligation or liability accrued or incurred in relation to the written contract, dated the 17th December 1962, entered into by the said relief undertaking with the Seksaria Cotton Mills Limited for the sale of Saco Lawell High Speed Combine Equipment and other machinery mentioned in the contract) and any remedy for the endorsement thereof shall be suspended and all proceedings relative thereto pending before any Court, Tribunal, Officer or Authority shall be stayed; and that in rolation to the said relief undertaking the awards and order specified in column 1 of the Schedule thereto appended shall be suspended in operation to the extent specified in column ? of the Schedule in respect of the periods respectively specified against them in column 3 of that Schedule; and any right, privilege, obligation and liability arising from nonpayment of wages, dearness allowance and gratuities and stipulated under the said awards and order shall not be enforceable in respect of the said periods;

LABOUR GAZETTE-OCTOBER 1970

and whereas, by Government Notification, Industries and Labour Department, No. BRU 184907/LAB (I), dated the 23rd March 1967, the Government of Maharashtra has includ under section 4 of the said Act that, with effect from the 14th day of March 1963, relation to the said relief undertaking and in respect of the period for which the said relief ertaking continues as such under sub-section (2) of section 3 of the said Act the award ind the 23rd May 1957, of the Industrial Court, Bombay, in Reference (IC) No. 99 of 1954; 199 of 1955 and No. 254 of 1955 made under the Bombay Industrial Relations Act, 1946 um, XI of 1947), which was applicable to the said Relief Undertakings immediately before was provided to it by the State Government for being run a relief undertaking, so far ir relates to the payment of gratuity to the employees of the Pratap Spinning, Weaving and anufacturing Company Limited, Amalner, shall be suspended in operation for the period m the 14th March 1963 up to the period for which the said relief undertaking continues to be relief undertaking; and any right, privilege or obligation arising from non-payment of gratuity stipulated under the said award shall be suspended in operation, and any right, privilege or ization arising from non-payment of gratuity as stipulated under the said award and any medy for the enforcement thereof shall be suspended and all proceedings relative thereto anding before any Court, Tribunal, Officer or Authority shall be stayed;

And whereas, the Government of Maharashtra is of opinion that the said relief undertaking hould be conducted to serve as a measure of unemployment relief for a further period of ne year commencing on the 14th September 1970 and ending on the 13th September 1971 and hat it should be exempt from the aforesaid provisions for the aforesaid period and that any ight, privilege, obligation or liability accrued or incurred before the said relief undertaking was leclared to be a relief undertaking shall be suspended and all proceedings relative thereto ending before any Court, Tribunal, Officer or Authority shall be stayed;

And whereas, the Government of Maharashtra is also of the opinion that in relation to the gid relief undertaking, the awards and order specified in column 1 of the Schedule hereto appended shall be suspended in operation to the extent specified in column 2 of that Schedule in respect of the periods respectively specified against them in column 3 of that Schedule and any right, privilege, obligation or liability arising from non-payment of wages, dearness allowance and gratuities as stipulated under the said awards and order shall not be enforceable in respect of the said period;

Now, therefore, in exercise of the powers conferred by section 3 and section 4 of the Bombay Relief Undertakings (Special Provisions) Act, 1958 (Bom. XCVI of 1958), the Government of Maharashtra hereby—

(a) declares that the industrial undertaking called the Pratap Spinning, Weaving and Manufacturing Company Limited, Amalner, shall for a further period of one year commencing on the 14th September 1970 and ending on the 13th September 1971 (both days inclusive) be conducted to serve as a measure of unemployment relief the said undertaking being hereinafter referred to as "the said Relief Undertaking"; and

(b) directs,-

(i) that in relation to the said relief undertaking and in respect of the said period of one year from the 14th September 1970 to 13th September 1971 (both days inclusive) for which that relief undertaking continues as such the provisions of—

(a) sections 35 to 41 (both inclusive) sub-sections (1) and (4) of section 42; sub-sections (1), (3), (4) and (5) and clauses (ai), (i), (a) and (ai) of sub-section (2) of section 46 and section 98 of the Bombay Industrial Relations Act, 1946 (Bom. XI of 1947);

(b) chapter V-A of the Industrial Disputes Act, 1947 (XIV of 1947); and

(c) all provisions of the Industrial Employment (Standing Orders) Act, 1946 (XX of 1946),

shall not apply; and the said relief undertaking shall be exempt from the aforesaid provisions of the Bombay Industrial Relations Act, 1946 (Bom. XI of 1947), chapter V-A of the Industrial Disputes Act, 1947 (XIV of 1947), and all provisions of the Industrial Employment (Standing Orders) Act, 1946 (XX of 1946);

^a M.G.G., Pt. I-L, September 3, 1970, pp. 5053-57.

(ii) that in relation to the said relief undertaking and in respect of the period for whether the said relief undertaking continues as such under sub-section (2) of section 3 of the said Act, any right, privilege, obligation or liability accrued or incurred before the said relief undertaking was declared to be a relief undertaking (not being a right, privile obligation or liability accrued or incurred in relation to the written contract, dated the 17th December 1962 entered into by the said relief undertaking with the Seksaria Cotton Mills Limited, for the sale of Saco Lawell High Speed Combing Equipment and thermachinery mentioned in the contract) and any remedy for the enforcement thereof shall be suspended and all proceedings relative thereto pending before any Court, Tribunal Officer or Authority shall be stayed; and

(*m*) that in relation to the said relief undertaking the awards and orders specified in column 1 of the Schedule hereto appended shall be suspended in operation to the extent specified in column 2 of that Schedule in respect of the periods respectively specified against them in column 3 of that Schedule; and any right. privilege, obligation and liability arising from non-payment of wages, dearness allowance and gratuities as stipulated under the said awards and order shall not be enforceable in respect of said periods.

Factories Act. 1948.

Industries and Labour Department No. FAC. 1667/143160/LAB-III, dated 10th September 1970⁷.—In exercise of the powers conferred by section 5 of the Factories Act, 1948 (LXII of 1948) the Government of Maharashtra hereby exempts all Government Defence Factories from the provisions of sections 51, 52, 54 and 56 of the said Act for a period of three months from the 17th September 1970.

Explanation.—For the purpose of this notification "defence factory" means any factory which is engaged in the production of ammunitions or any defence supplies or in work which is directly in furtherance of the efficient defence, in India.

Industries and Labour Department No. WJA-1068/140339-Lab-II, dated 8th September 1970 *.- The following Resolution by the Government of India Ministry of Labour, Employment and Rehabilitation is republished :---

GOVERNMENT OF INDIA

MINISTRY OF LABOUR, EMPLOYMENT AND REHABILITATION (DEPARTMENT OF LABOUR AND EMPLOYMENT) New Delhi, dated the 13th July, 1970

RESOLUTION

No. W-15(17)/65.—By their Resolution No. WB-15(1)/64, dated the 28th May, 1966, the Government of India set up a Central Wage Board for Electricity Undertakings with the following composition and terms of reference :--(A) COMPOSITION :

Chairman

Shri P. P. R. Sawhny.

¹ M. G. G., Pt. I-L, September 17, 1970, p. 5252-53. ⁴ M. G. G., Pt. I-L, September 17, 1970, p. 5253-5266. Representative of Employers, appointed by the Central Government in consultation with he Employees.

Representatives of the State Governments

Independent Members

1. Shri Jagannath Rao Chandriki, M.P. 2. Shri M. B. Desai.

Members Representing Employers

- 1. Shri R. P. Aiyer.
- 2. Shri S. N. Ray.
- 3. Shri U. Chandu Nair.

Members Representing Workers

- 1. Shri J. C. Dixit.
- 2. Shri D. P. Pathak.
- 3. Shri Vimal Mehrotra.

Member Secretary

Shri Teja Singh Sahni

subjeq iently, Shri G. Venkutswami, M.P. was appointed a Member of the Boa d in place of Shri Jagannath Rao, Chun Iriki, Similarly Shri S. Dutt, Mazumdar, was appointed in place of Shri S. N. Ray and Shri G. Simbisiviah in place of Shri Chandu Nair, Later, Shri S. F. Raja was appointed in place of Shri Sambasiviah.

Shri Vidya Prakash was appointed Member-Secretary of the Wage Board in place of Shri Teja Singh Sahni.

The above changes in the composition of the Board were notified from time to time.

(B) TIRMS OF REFERENCE :

(a) to determine the categories of employees (minual, clerical, supervisory etc.) who should be brought within the scope of the proposed wage fixation ;

(b) to work out a wate structure based on the principles of fair wages as set forth in the Report of the Committee on Fair Wages; and

(c) to evolve a Gratuity Scheme for the Industry.

Explanation.—In evolving a wage structure, the Board should, in addition to the considerations relating to fair wages, also take into account—

(i) the public utility character of electricity undertakings ;

(ii) the need of the industry in a developing economy;

(iii) the requirements of social justice ;

(iv) the need for adjusting wage differentials in such a manner as to provide incentive to workers for advancing their skill; and

(v) the desirability of extending the system of payment by results.

Explanations.—In applying the system of payment by results, the Board shall keep in view the need for fixing a minim im (fall-back wage) and also to safeg iard against over-work and undue speed.

2. The Wage Board mide interim recoin nendations and these were accepted in terms of Government Resolution No. WB-15(24)/67, dated the 20th June, 1968.

3. The Board's final report was sub-nitted to Government on the 19th December 1959. A sum nary of conclusions and recommendations of the Board is appended.

4. After careful consideration, Government has decided to accept the recommendations of the Wage Board in so far as they relate to matters falling within its terms of reference, and request the parties to take steps for expeditious implementation of the recommendations.

3. The Government of India wish to express their appreciation of the manner in which the and has dealt with matters referred to it and made unanimous recommendations.

(Signed) T. S. SANKARAN,

Joint Secretary to the Government of India.

Drder

Ordered that a copy of the Resolution be communicated to all concerned. Ordered also that the Resolution be published in the *Gazette of India* (Extraordinary) for general information.

> (Signed) T. S. SANKARAN, Joint Secetary to the Government of India.

Appendix

CENTRAL WAGE BOARD FOR ELECTRICITY UNDERTAKING.

Summary of conclusions and recommendations

1 The recommendations of the Wage Board cover workmen employed in Licensee undertakings coming with the purview of the Indian Electricity Act, 1910 and of the State Electricity Boards. They would, however, not cover employees of the Damodar Valley Corporation, Nomby Electricity Supply and Transport Undertakings Electricity Undertakings which are run as Government departments and where Service conditions of the employees are regulated by the departmental orders applicable to Government servants in general.

2. The recommendations apply to all workmen who are covered by the definitions of workman as given as section 2(s) of the Industrial Disputes Act, 1947 and who are drawing a salary i.e. wages up to Rs. 750 per month.

3. The staff engaged on muster roll, on work-charged basis and on daily-rates of pay fall within the purview of the Board.

4. The teaching, medical and guest house staff are excluded from the purview of the Board because of the peculiar and varrying nature of their employment.

5. It is essential that the rural electrification which is an important feature of the over-all development programme, is made economically viable as early as possible.

6. Since power resources are not evenly distributed, future power development will have to be planned on a national basis. In this context, the establishment of super-power stations and the formation of regional and national grids is an urgent necessity for optimum utilisation of the available resources.

7. The special features of the development and growth of the electricity industry have been kept in view while dealing with the task entrusted to the Wage Board.

8. The Wage Board, after giving the due thought to all aspects of the matter, has base its recommendations for the country as a whole on practical considerations keeping in whole on practical consid the minimum needs of the workers in the electricity industry as well as the capacity of m vital industry to meet such needs.

9. It is likely that the present financial position of the industry as revealed by the finan. statements of the undertakings for the last few years, particularly of the State Electricity Board may improve gradually in future. As their development and expansion programmes, orient to a social purpose, progress, the component of productive content of their structure is his to enlarge eventually and the time may come when the Boards would be able to concentrate on intensification of supply. Both these aspects have a bearing on the profitability and tist March, 1971. usefulness of the activities of the State Electricity Boards.

10. The financial position of the State Electricity Boards can also improve if steps are taken to increase revenue and to decrease expenditure by such means as higher working efficiency reduction in transmission losses and rationalisation of manpower.

11. It is not possible for the Wage Board to assess the impact of their recommendation on the profitability of the electricity undertakings. The Wages of workers in this industry are being examined for the first time on a national level while in the case of quite a few indus. ries, second wage boards have already completed their labours.

12. The State Electricity Boards have no equity capital and depend solely on loan capital According to the recommendations of the Venkataraman Committee, they are required to earn a higher net return on their capital base than the licensee undertakings. It is recommen. ded that these aspects of the finances of the State Electricity Board are taken up by the limit the Electricity Board in terms of the scheme laid down by the Wage Board. Government for a review with a view to suitable revision.

13. The measurement of labour productivity in the industry presents formidable problems However, in some limited areas group incentive schemes can be considered. The formulation Board. of such schemes has to be left to the individual organisations and their unions.

14. For achieving completion of large projects ahead of schedule and to attain higher reliability and station efficiency, provision of in-plant training facilities to the workers assume ereat importance.

15. So also the introduction of welfare schemes has a positive impact on the efficiency of the workers.

16. In view of the needs of the electricity industry in the developing economy of the country and t'e limitation of its resources, the Wage Board have not found it feasible to recommend a need-based minimum wage; nor have the Wage Board attempted to make their own estimate of such a wage.

17. Owing to the peculiar nature of the industry, it is not expedient or feasible to link wages to productivity at this stage.

18. The Wage Board's recommendations regarding minimum wage, wage-scales, dearness allowance, house rent allowance and other fringe benefits, and fitment of workers are laid down in paragraph 8.32 to 8.38. (Extracts at Annexure I).

19. The recommendations regarding muster-roll and work-charged workers find mention in paras. 8.40 to 8.42. (Extracts at Annexure I).

20. The Wage Board's recommendations regarding categorisation of workers are contained in paras. 8.39 and 9.13. (Extracts at Annexure I).

21. The recommendations of the Wage Board would be operative for five years from

22. The between the existing basic wages and dearness allowance (including Interim relief) and those recommended by the Board excluding house rent allowance shall be made up as far as practicable in three equated annual instalments from 1st April, 1969.

LABOUR GAZETTE-OCTOBER 1970

It will not be open to workmen to raise any dispute or demand any revision in the are structure during a period of four years from 1st April 1969.

The gratuity scheme recommended by the Board is laid down in the Annexure to thatter X (Copy at Annexure II).

15. The gratuity scheme would be applied with effect from the 1st April 1972 in the detakings which at present have no gratuity scheme whatsoever. The undertaking ty, however, consider paying gratuity in accordance with the scheme on an er-gratia basis all employees covered by the scheme from 1st April 1971 i.e., to those who retire after

26. All such undertakings as have gratuity scheme at present will apply the scheme commended by the Wage Board from 28th May, 1966.

27. In medium and small sized licensee undertakings where there is no scheme of gratuity present the scheme recommended will be introduced subject to the condition that their spective liability will be limited to such number of months basic wages as there are years the before the undertaking is acquired by the purchasing authority provided such years are is than three in number.

28. Where an employee of a licensee undertaking is taken over by the State Electricity hard at the time the undertaking is acquired, and the terms of the transfer of the services the employees satisfies the three conditions laid down in the provise to section 25 FF the Industrial Disputes Act, 1947, the employee will be entitled to receive the gratuity

29. In regard to existing gratuity schemes certain benefits accruing thereunder will not reduced for existing employees to bring them in line with the scheme recommended by the

Annexure I

(Extracts of paras. 8.32 to 8.42 and para. 9.13 in the Report of the Central Wage Board for Electricity Undertakings)

8.32. Minimum wage.-(1) The total monthly emoluments of the lowest paid unskilled morker would be Rs. 148 constituted as under :--

| Basic wage | Rs. 55 00 |
|----------------------|-----------|
| Dearness allowance | Rs. 85 00 |
| House rent allowance | Rs. 8.00 |

(2) However, in big cities, covered by the list of Class "A", "B1 " and "B2 " published the Ministry of Finance, Government of India for the grant of House Rent Allowance o the Central Government employees (list given below), the House Rent Allowance would Rs. 15 instead of Rs. 8 thus making a total minimum monthly emoluments of Rs. 155 as minst Rs. 148 elsewhere :

| Class A | . 1. Bombay. |
|-----------|-----------------|
| | 2. Calcutta. |
| | 3. Delhi. |
| | 4. Madras. |
| Class B 1 | . I. Ahmedabad. |
| | 2. Bangalore. |
| | 3. Hyderabad. |
| | 4. Kanpur. |
| | 5. Poona. |
| 4735-3 | |

167

Class B 2

- Allahabad.
 Banaras (Varanasi).
- 4. Jaipur.

1. Agra.

- 5. Lucknow.
- 6. Madurai.
- 7. Nagpur.

Undertakings units paying house rent allowance in excess of Rs. 8 or Rs. 15 as the case may be, would continue to do so at the same rate without any reduction and the different in the allowance would not be adjusted against the increase that might accrue to the in the iteration of the other two constituents of the minimum wage, namely, the Basic and the dearness allowance put together. If the employer is providing rent-free quarters of charging a rental of less than 10 per cent. of the Basic Wage, the difference between the actual rent charged and 10 per cent. of the Basic Wage will be set off against the amount of Rs. 8 Rs. 15 as the case may be.

(3) The basic wage and the dearness allowance put together shall not be less than Rs. 144 Where an undertaking has been paying more than Rs. 55 as the basic wage, it would be required to pay the difference between Rs. 140 and the basic wage so paid as dearness allow, ance. Where an undertaking has been paying less than Rs. 55 as the basic wage, it have to increase the basic wage to Rs. 55 and pay the balance of Rs.85 as dearness allowance.

(4) The dearness allowance of Rs. 85 (on the basis of Rs. 55 as the basic wage) would be linked to the cost of living index at 171 with the 1960 series of the all India Average Consume Price Index Numbers of Working Class published by the Labour Bureau, Simla as base For every rise or fall in the index number, an adjustment of 75 paise per point would made in the dearness allowance. The revision will be effective prospectively from 1st April every year on the basis of the average of the indices for the preceding 12 months from January to December. No adjustment in dearness allowance would, however, be made if the inder falls below 171.

(5) The total minimum monthly emoluments recommended above would take effect from 1st April 1969 and the first adjustment of dearness allowance will be effective from 1st April 1970 based on the average of the Consumer Price Index Numbers from January 1969 to December 1969.

(6) If an undertaking or unit had on 31st March 1969 a wage scale under which the starting basic wage plus dearness allowance payable on such wage to an unskilled worker was more than Rs. 140 per month, the recommendation made above regarding the minimum wage payable to the unskilled worker will not apply to such an undertaking/Unit : and the unskilled worker in such an undertaking will continue to be entitled to the same higher basic wage-cum-dearness allowance that he may be receiving.

(7) The cash value of the food subsidy whetever provided by an establishment or unit would be adjustable against the dearness allowance but the worker would have the option to prefer the dearness allowance in cash or partly in cash and partly in the form of subsidised food.

8.33. (1) Wage-scales.—The Board recommends the following 21 scales of pay for the different categories (f workets and employees (both technical and administrative) in which all of them would be placed in the manner suggested hereafter :—

Technical

| | | 35(3)-750. | 1 - 9 0 00 01 |
| | | (E.B. –after 10th stage.) | |
| | | | |

([]) Dearness allowance.—The Board recommends the following rates of dearness allowance different slabs of basic wage:—

| Pay slab | | | Dearness allowance |
|----------|----|----|---|
| Rs. | | | Rs. |
| Upto 109 | | | Upto 85* |
| 110-149 | | | 98 |
| 150-209 | | | 122 |
| 210-399 | | | 146 |
| 400-449 | | | 160 |
| 450-499 | | | 164 |
| 500542 | •• | •• | Amount by which the pay falls short of Rs. 663. |
| 543—999 | | | 120 |

•The exact amount of dearness allowance for this slab would be fixed in the manner as sommended in paragraph 8.32(3).

(III) House rent allowance.—The Board also recommends that the house rent allowance the lowest paid category of unskilled workers, namely Rs. 8 and Rs. 15 as the case may be by para 8.32(1) and (2) should be extended to three more categories of wage-scales, viz. 15.2, 3 and 4 both under "Technical" and "Ad ministrative" as shown in paragraph 8.33.

Where rent-free quarters have been provided or a rental of less than 10 per cent. of the sic wage is being charged the difference between the actual rent charged and 10 per cent. Ithebasic wage will be set off against the amount of house rent allowance as the case may be. R 4735-3a

169

In the case of undertakings where appropriate scales of pay and dearness allowance gether exceed the total quantum of basic pay and dearness allowance including house allowance recommended by the Wage Board in respect of the corresponding scale no allow by way of house rent allowance will be payable by them.

(IV) Miscellaneous,-(1) The above recommendations will not apply (1) in the case officers employed in undertakings whose terms of service are governed by specific covera for a limited specified period not exceeding five years and (ii) in the case of workmen by undertakings who are governed by agreements between recognised unions and the ments, which specifically provide for non-application of the Wage Board's recommendation provided such agreements were entered into after 20th June 1968, the date of the Governme of India Resolution accepting the interim recommendations of the Board.

(2) If an employee in any category other than the unskilled worker was enjoying on u March 1969 a higher scale of wages or higher annual increments or higher dearness allowa or higher house rent allowance, he will continue to get the same.

(3) If any employee in an undertaking was getting any allowance, benefit, concession fringe benefits of any kind whatsoever, other than basic wage, dearness allowance and how rent allowance, the allowance, benefit, concession or fringe benefit will not be curtailed any manner on the ground that it is basic wage, dearness allowance or house rent allowance has been increased as a result of the recommendations of the Wage Board.

(4) The Wage Board have considered whether or not the system of free electricity obtain in some undertakings should be extended universally. After mature consideration the ma has felt that in view of the limitations imposed by section 23 of the Indian Electricity 1910, the benefit of free electricity to an employee as such would be objectionable. 23 of the Indian Electricity Act, 1910, stipulates that "a licensee shall not in making an agreement for the supply of energy show undue preference to any person". The wor " any person " should encompass employees as well, and consequently the analogy of railwa systems and air systems offering free passages to the employees would not be appropriate

Although the provision of section 23 of the Indian Electricity Act, 1910, does not app to the State Electricity Boards, it is only proper that the principles enunciated against und preference should be applied uniformly to the Industry as a whole. Consequently the Wag Board propose to make no recommendations. This however will not adversely affect the existing loop little

8.34. (V) Fitment.—In paragraphs 8.23 and 8.33 above, the Board has made recommend dations about the minimum basic wage as well as the quantum of dearness allowance payable to an unskilled worker, the scales of basic wages for different categories of employee drawing up to Rs. 750 per month and the amount of dearness allowance payable to them o the basis of different slabs of basic wages. It is now necessary to define the principles that et us vers of uninterrupted qualifying service subject to a maximum of three increshould guide the different undertakings in the matter of fitment of the workers into the new unis in all and his initial basic wage in the new scale will be fixed accordingly. scales as recommended. An electricity undertakings in the country have adopted wide divergent scales of pay with equally divergent nomenclatures and designations, it has real been a problem for this Board to define clear-cut principles so as to achieve uniformity the matter of adoption of standard scales vis-a-vis their fitment. However, after very carefu consideration, the Board recommends the following principles.

8.35. For the first slab of basic wages up to Rs. 109 per month only, the quantum of dearness allowance will have to be fixed in the light of the prevailing basic wages. Accord ing to our recommendations made in paragraph 8.32(3) read with paragraph 8.32(i), th quantum of dearness allowance for the lowest paid unskilled worker of this slab would b Rs. 85 when the basic wage is Rs. 55 per month. The quantum of dearness allowance is, however, variable depending on the basic wage. The following illustrations will enable the undertakings to determine the quantum of dearness allowance payable to their lowest paid unskilled worker :---

(In all sections of paragraphs 8.35 and 8.36 including the five illustrations given below, the basic wage has to be taken as the starting salary of the lowest paid unskilled worker

LABOUR GAZETTE- OCTOBER

a) In case where the basic wage is less than Rs. 55 and the dearness allowance is also than Rs. 85 and the total is less than Rs. 140 per month, the basic wage will be raised Rs 55 and the dearness allowance to Rs. 85;

(b) If dearness allowance is more than Rs. 85 but the total of the deanress allowance the basic wage is less than Rs. 140, then the basic wage shall be raised to Rs. 55 the dearness allowance reduced to Rs. 85;

Where the basic wage is more than Rs. 55 but the total of the basic wage and the vaness allowance is less than Rs. 140, then the existing basic wage shall remain disturbed and the quantum of dearness allowance will be the difference between 140 and the existing basic wage :

(1) Where the total of basic wage and dearness allowance is more than Rs. 140 but basic wage is less than Rs. 55, the basic wage shall be raised to Rs. 55 and the balance the total will be treated as dearness allowance; and

(e) Where the total of the basic wage and the dearness allowance is more than Rs. 140 ind the basic wage is also more than Rs. 55 per month, there shall be no change and busic and dearness allowance will continue to be the same.

allowance as determined in the above manner for the lowest paid admissible to all workers drawing basic wages month

36. (a) The quantum of dearness allowance having been fixed as above, the basic wage worker drawing more than Rs. 55 but less than 109 per month will be fixed in the new is as at plicable to him at the stage ight his existing basic and the list March His next increment in the New Scale will be admissible one year after the date on which basic pay is fixed in the New scale as above.

(b) (i) Where the existing basic wages are less than Rs. 55, such basic wages shall have be raised to Rs. 55. Workers with varying lengths of service will thus start in the new with Rs. 55 as basic wage except in cases provided in (ii) below and will thereafter we the benefits of the new increments as in the new scales.

(ii) Where the difference between the existing basic wage of a worker and the minimum the new scale in which he is to be fitted is less than three times the rate of initial increment the new scale, he will be entitled to service increments at the rate of one increment for five years of uninterrupted qualifying service subject to a maximum of three incrents in all and his initial basic wage in the new scale will be fixed accordingly.

(iii) Where the existing wage of a worker is equal to the minimum of the new scale in which is to be fitted, he will be entitled to service increments at the rate of one increment for

(w) Where the existing basic wage of a worker is in between two stages of the new scale basic wage will be brought first of all to the next higher stage of the new scale, and thereter he will be entitled to service increments at the rate of one increment for every five ars of uninterrupted qualifying service up to a maximum of two increments.

8.36A. The same principles as in paragraph 8.36 will apply to the next higher slab of v viz. Rs. 110-149.

8.37 For subsequent slabs of pay viz., Rs. 150-209, Rs. 210-399, Rs. 400-449, 450-Rs. 500-542 and Rs. 543-750, the quantum of dearness allowance has been indicated paragraph 8.33(ii). It will now be necessary to fix the basic wage of a worker entitle to enew scale of basic wage falling under any of those slabs in the following manner:-

(a) First of all, the worker has to be given the appropriate new scale depending on the usture of the job he is performing and the degree of his skill;

(b) Where the existing basic wage of a worker is not less than the minimum of new scale in which he is to be fitted, his new basic wage will be fixed in the new scale at the next

LABOUR GAZETTE-OCTOBER 1970

than the amount representing twice the amount of the initial annual increment of the new scale, he will be entitled to service increments at the rate of one increment for five years a uninterrupted qualifying service subject to a maximum of three increments in all, or Rs. over the minimum of the new scale; whichever is less, and his initial basic wage in the new scale will be fixed accordingly.

(d) Where the minimum of the new scale is higher than that of the existing scale of worker, but the rate of dearness allowance received by him is higher than what has recommended by the Board and the total of the two items exceeds the amount to which he would otherwise have been entitled under (c) above, the excess in dearness allowand representing the difference between what has been recommended and what the worker. receiving, will be merged with his existing basic pay. For example, if a worker is at present drawing Rs. 150 as basic wage and Rs. 150 as dearness allowance, making the total of these two items Rs. 300, the dearness allowance now suggested being Rs. 122, the excess of Rs, 28 will get added on to the existing basic wage of the worker. Similarly, if a worker is receiving Rs. 380 as basic wage, his dearness allowance according to the recommendation of the Board will be Rs. 146; but if his actual dearness allowance at present is Rs. 200 this difference of Rs. 54 will get added on to his present basic wage. After adding this difference to the basic wage, if the worker is entitled to any higher basic wage in the light of what has been recommended, he would get it. In other words, he will get one increment for every five years of completed uninterrupted service subject to a maximum of three increments in all provided on 1st April 1969 his length of uninterrupted completed service. is five years or more.

8.38. In calculating the existing total empluments of a worker (including basic wage and dearness allowance), the interim relief wherever paid or payable will be included.

8.39. (VI) Categorisation. - The Board have examined the question of categorisation of workers according to the nature of their jobs and the degree of the skill so that the under takings could fit them in the appropriate new scales as recommended. It was found that the existing scales of pay as well as designations of workers vary widely from undertaking id undertaking and it is really difficult for the Board to make specific recommendations in regard to categorisation because of the complexities involved. The Sub-Committee on Standard sation of Nomenclatures with Job Description also examined this aspect and felt that "each undertaking will process the fitn ent of each of its employees in his proper category and the allocation of a standard nomenclature. This will be done by scrutinizing the possible standard nomenclatures and corresponding job descriptions and following the procedures adopted the Sub-Committee as explained in this Report in section 5 (Procedures adopted for the study and Appendix D and as illustrated in the study in depth for Gujarath Electricity Board The Board, therefore, recommends that this matter of categorisation should be left to the respective undertakings which should decide this question on the basis of proper examination and processing through a Committee consisting of the representatives of the management and of the recognised unions.

8.40. (VII) Muster-roll and work-charged workers.-The Wage Board have considered the question of nominal muster-roll and work-charged workers employed in electricity undertakings, especially the State Electricity Boards. This category of workers has been in existence in the Public Works Departments of the State Governments since a long time. With the expansion of activities under various development programmes, the State Electricity Boards workers have had to leave the organisation and seek employment elsewhere as it was not possible for the Electricity Boards to absorb all of them. It has been mentioned to this Board that even in other branches of the State Electricity Boards, the practice of employing muster-

the Board, however, feels that in other branches of the State Electricity Boards where the (c) Where the existing basic wage of a worker is less than the minimum of the new scale ork is regular and permanent in nature as for example the maintenance and the operational in which he is to be fitted, he will start from the minimum of the new scale. If, however, wallches, such posts should be filled up by regular workers and not by muster-roll/workthe difference between this existing basic wage and the minimum of the new scale is les harged workers. This Board is of the view that it is desirable to discontinue as soon as suble, and according to a phased programme, the practice of employing muster-roll workers regular and permanent posts. The Wage Board recommends that such posts should be aled up by regular workers chosen from amongst the existing muster-roll and work-charged orkers as far as practicable depending on their suitability.

> 8.42. It is the Board's recommendation that an unskilled muster-roll/work-charged worker should be paid a minimum of Rs. 3 50 as a consolidated daily wage. Where a higher wate is puid, it should continue to be paid. If under the existing statutes any other benefits admissible, such benefit should also be given to this category of workers.

> Note.—The terms present basic wage or existing basic wage means the basic wage of a worker as on 31st March, 1969.

> 9.13. The Report of the Sub-Committee was considered by the Wage Board and was tormally adopted subject to the clear understanding that the categories of employees as mentioned under each classification in the studies made by the Sub-Committee of the three Boards and two private undertakings were only illustrative in nature and open to suitable modifications wherever considered necessary. It was further decided that there should be It times scales of pay instead of the nine teen recommended by the Sub-Committee, the additional being for two new categories under the Administrative and Clerical classification, namely Semi-skilled B and A instead of "Semi-skilled" and Highly skilled B and A instead of "Highly skilled". Based on the Report of the Sub-Consmittee the Wage Board recommend s follows -

(1) Each undertaking shall divide all its employees into two classifications, each with two groups, as stated in the preceding para and then evaluate the job of each employee for its relative skill or worth. This will be done following the procedures adopted by the Sub-Committee as explained in its report in section 5 (Procedures adopted for study). Appendix D, and as illustrated in the study in depth for Gujarat Electricity Board (Appendix I in Sub-Committee's Report).

(2) Based on the results of the above evaluation, each employee shall be fitted in his proper category from the list given in para. 7.1 of the Sub-Committee's Report, as modified by the decision of the Board to recommend twenty-one scales. This will be done separately for each of the two groups in the two classifications. In the placement of employees in appropriate categories, it is to be cautioned that the points scored by different categories of employees will vary with each undertaking depending upon the regional differences, the requirements of education and experience and several other factors. Therefore the range of points within which a category or its wage-scale will be encompassed will differ from one undertaking to another. To amplify, para, 5.9 of the Sub-Committee's report is reproduced below because of its relevance and importance :-

"The range of points within which a particular category would fall will differ from one undertaking to another to some extent, depending on the organisational structure of each undertaking. For this reason the point ratings of various categories in different undertakings cannot be directly compared. Also since the plans for evaluation in the case of the two classifications of employees are basically different and since even in the same classification, the approach to evaluation differs between the supervisory and nonsupervisory groups, the points ratings under the four groups of the two classifications cannot be directly compared. Therefore, while the points scored will be a general guide in the determination of wages, it is to be cautioned that an attempt should not be made numerically to link by means of a formula, the points with the wages."

duties. The procedure for this purpose is illustrated in Appendix I and note in Appendix E to F of the Sub-Committee's report. No significance will, however, by attached to descriptions except that they will be useful in understanding the functions of an employed in his daily work and that they will reflect local practices.

(4) The Sub-Committee in its study and report have excluded the jobs of Guest House Teaching and Medical Staff. Accordingly, the staff under these cagetories shall not covered by present recommendations and their cases shall be considered by each individual undertaking depending upon local conditions.

(5) The undertakings shall avoid down-grading in case of any of their existing employee although it is inevitable that the existing grading of some jobs will be disturbed while allocat ing standard nomenclatures to their employees, instead the approach shall be to re-allocat the work content of the particular jcb on mutually agreed basis. This deviation from standardisation shall be avoided in case of new entrants.

(6) It is possible that while implementing the above recommendations there may be employees who are evaluated as falling between two categories. Further, to suit the needs of individual undertakings and to promote efficiency, it will be sometimes desirable to permit marginal upward adjustments in the duties as compared to standard job descriptions Examples are office staff using specialised office machines, steno-typists doing confidential work, clerks handling cash, accountants with limited power of attorney. These departures from standardisation may be permutted.

(7) The undertakings shall endeavour where feasible to combine and allocate jobs pertaining to more than one nomenclature to an employee on a mutually agreed basis Such a combination will result in the duties of an employee being of an omnibus type. In such cases, the employees will be given the standard nomenclature, corresponding to his main duties, while for convenience the standard nomenclatures covering his other duties can be indicated in brackets. In this connection, a reference can be made for further details to paragraph 6.3 of the Sub-Committee's report.

(8) Employees shall also be allocated stand-by and staggered duties, as descrided in para. 6.3 of the Sub-Comnuttee's report.

(9) Undertakings shall so allocate their staff as to ensure that employees working in units of larger sizes are fitted into higher categories, commensurate with the responsibilities involved. For this purpose, units whether they are generating stations or receiving stations or transmission/distribution systems shall be classified as large, medium and small according to local convensions subject to the norms laid down in paragraph 6.9 of Chapter VI. For example, if an operator is put in the category 'Skilled C' when working in a generation station, say 30 MW, capacity, an operator doing more or less similar work but in a generating station of medium size of say 100 MW, capacity may be placed in the category 'Skilled B', to take care of the increased responsibility. The mechanism for arriving at the details of such placements will be decided by individual Electricity Board and their unions.

(10) for promotion from one category to another, the emphasis shall be on higher skill and not only on seniority and, at the same time, maintaining some ratio for promotion from a lower to a higher category to open up promotional avenues. It is suggested that undertakings shall evolve standard trade tests up to highly skilled category. For supervisory categories, more weightage shall be given to supervision, improvement and goals achieved.

(11) Manuals for the smooth implementation of recommendations 5 to 10 inclusive shall be prepared by each undertaking to suits individual needs and character. These manuals will also define the nature of compensation payable to employees (i) for marginal increases in duties from the standard job descriptions where an existing employee is considered as rated between 2 categories, and (ii) for omnibus, stand-by, and staggered type of duties. The Wage Board do not consider that the preparation of such manuals falls within their

LABOUR GAZETTE-OCTOBER 1970

(12) In implementing, the above recommendations, undertakings will arrive at final settleint in consultation with their unions and by applying the principles of collective bargaining.

(13) It is also recommended that the Ministry of Labour and Employment may set up a itable panel of machinery to provide the services of independent experts for assisting the indertakings in the in.plementation of the above recommendations, specially when external sistance is sought to resolve any differences that may be outstanding.

Annexure II

COVERAGE

The Gratuity Scheme will apply to all the employees who are in regular or permanent moloyment but will not apply to work-charged, and muster-roll workers. The benefits of the Gratuity Scheme will also apply from the date of their continuous employment, to the emporary, substitute, and probationary employees, on regular or permanent posts but when they are confirmed in their respective posts.

ENTITLEMENT

(1) The minimum qualifying period of service would be five years.

(2) Employees (or their nominees or legal heirs) would be entitled to gratuity in the event

(i) death;

(ii) termination :

disablement or medical unfitness ;

(in) retirement ;

(iv) voluntary retirement with the consent of the employer prior to age of superannuation ;

(v) retrenchment for any reason whatsoever ;

(vi) resignation after completing 10 years of service;

(vii) discharge or dismissal for misconduct provided the misconduct is not of a gross nature.

(3) The minimum qualifying period of service laid down above shall not apply in the case of 2(i) and 2(i):-

OUANTUM

The quantum of gratuity will be equal to 15 days' basic wage for each completed year of qualifying service for those employees who retire before rendering 15 years of service, and for employees who retire after 15 years of qualifying service, the quantum of gratuity will be equal to one month's basic wage for each completed year of service subject to a maximum of 15 months basic wage or Rs. 10,000 whichever is lower.

Bombay Shops and Establishments Act, 1948

Industries and labour Department No. BSE 1470/144263/LAB-II, dated 16th September 19709.- In exercise of the powers conferred by the proviso to section 4 of the Bombay Shops and Establishments Act, "1948 (Bom LXXIX of 1948) (hereinafter referred to as " the said Act"), the Government of Maharashtra hereby amends Schedule II to the said Act as follows

In the said Schedule II, after entry No. 148, the following entry shall be added, namely

"Shops selling flowers, pans, garlands, Sections 10(1), 11(1)(a), subject to concoconuts, and sweet cil etc., situated in the premises of Shri Tulja Bhavani Temple, Tuljaper.

dition that no shops shall be opened earlier than 5-00 a.m. and be closed later than 10-00 p.m. on any day. Section 18 subject to the condition that the employees concerned are granted one day holiday in a week without making any dedu-

Industrial Disputef Act, 1947

176

Industries and Labour Department No. 1D A 1168'129230/LAB. II, dated 20th August 1970. In exercise of the powers conferred by clauses (a) and (g) of sub-section (2) of section 38 of the Industrial Disputes Act, 1947 (XIV of 1947), and of all other powers enabling it in this behalf, the Government of Maharashtra, hereby makes the following rules, the same having been previously published as required by sub-section (1) of the said section 38 of the said Act, namely

Rules

1. These rules may be called the Industrial Disputes Bombay (Third Amendment) Rules 1970.

2. Rules 26 of the Industrial Disputes (Bombay) Rules, 1957, shall be renumbered as sub-rule (1) of that rule and after sub-rule (1) as so renumbered, the following new sub-rule shall be inserted, namely (-)

"(2) Where any award, order or decision is made *ex-parte* under sub-rule (1), the aggrieved party may, within thirty days of the receipts of a copy thereof, make an application to the Board, Court, Labour Court, Tribunal or an Arbitrator, as the case may be to set aside such award, order or decision. If the Board, Labour Court, Tribunal or Arbitrator is, satisfied that there was sufficient cause for non-appearance of the aggreved party, it or he may set aside the award, order or decision so made and shall appoint a date or proceeding with the matter;

* Provided that, no award, order or decision shall be set aside on any application as aforesaid unless notice thereof has been served on the opposite party. "

Consumer Price Index Numbers for Working Class for August 1970

BOMBAY*

181-A fall of 2 points

In August 1970, the Consumer Price Index Number for Working Class (New Series) for the Bombay Centre with base : January to December 1960 equal to 100 was 181 being lower than that in the preceding month. The index relates to the standard of life ascertained during the year 1958-59, family living survey at the Bombay Centre.

The index number for the food group decreased by 3 points to 199, due to fall in the average prices of rice, bajra, arhar-dal, gramdal, moongdal, masurdal, fish fresh bumlows, eggs, milk-pure, curd, ghee, sugar, and a fall in the sub-group index of vegetables and fruits.

The index number for the pan, supari, tobacco, etc. group decreased by 4 points to 185 due to fall in the average price of pan-leaf.

The index number for the clothing, bedding and footwear group increased by 1 point to 158 due to a rise in the average prices of dhoties, saree, shirting, trousers cloth, full pant, and vest.

The index number for the miscellaneous group increased by 1 point to 156 due to a rise in the average prices of exercise book, hair oil, toilet soap, toothpowder, umbrella, durrie, washing soap, and tailoring charges of blouse.

The index number for the fuel and light group and housing remained constant at 179 and 113 respectively.

CONSUMER PRICE INDEX NUMBERS (NEW SERIES) FOR WORKING CLASS FOR BOMBAY CITY (Average price for the calendar year 1960-100)

LABOUR GAZETTE-OCTOBER 1970

HOLAPUR*

183-Index remained stationary

In August 1970, the Consumer Price Index Number for Working Class Series) for Sholapur Centre with base : January to December 1960 ual to 100 was 183 being the same as that in the preceding month. The dex relates to the standard of life ascertained during the year 1958-59 family twing survey in Sholapur City.

The index Number for the Pan, Supari, tobacco, etc. group decreased by points to 161 due to a fall in the average price of Pan leaf.

The index number for the Miscellaneous group increased by 1 point to 160 due to a rise in the average prices of toilet soap, and washing soap.

The index numbers for the food, the fuel and light, the clothing, bedding and footwear groups and housing, however, remained stationary at 196, 171, 173 and 132 respectively.

NAGPUR* rise of 2 points

August 1970, the Consumer Price Index Number for Working Class Series) for Nagpur Centre, with base: January to December 1960 equal 100 was 187 being 2 points higher than that in the preceding month. The los relates to the standard of life ascertained during the 1958-59 family and survey in Nagpur City.

The index number for the food group increased by 2 points to 209 due mainly a rise in the average prices of wheat, gingelli oil, groundnut oil, linseed oil, and onions.

The index number for the Pan-supari, tobacco, etc., group decreased by reports to 181 due to a fall in the average price of Pan leaf.

The index number for the clothing, bedding and footwear group increased 4 points to 184 due to a rise in the average prices of dhoti, shirting, trousers with long cloth, markin, shoes gents, and sandle ladies.

The index number for the miscellaneous group increased by 1 point to 146 the to a rise in the averages prices of hair oil, toilet soap, face powder, school took cinema charges, and washing soap.

The index numbers for the fuel and light group and housing remained achanged at 158 and 130 respectively.

LABOUR GAZETTE-OCTOBER 1970

AURANGABAD*

184 Index remained stationary

In August 1970, the Consumer Price Index Number for Working Class for A_{2} Au angabad Centre with base year January to December 1961 equal to 100 was 184 being the same as that of the previous month. The index relates 100 the standard of life ascertained during the year 1958-59 family living survey 100 the Aurangabad Centre.

The index number for the food group decreased by 1 point to 198, due to the decrease in the average prices of wheat, gramdal, moongdal, masurdal, karad oil, vanaspati (dalda), mutton (goat-meat), chillies dry and bananas.

The index number for the miscellaneous group decreased by 1 point to 156, due to the decrease in the average price of pan leaf.

The index number for housing increased by 10 points to 171, as a result of the Six-Monthly House-Rent Survey conducted at Aurangabad during July 1970.

The index numbers for the fuel and light and the clothing and footwear groups remained stationary at 162 and 166 respectively.

LABOUR GAZETTE- OCTOBER 1970

INDUSTRIAL DISPUTES IN MAHARASHTRA STATE DURING JUNE 1970

| *Disputes in June 1970 | | - | 4.00 | ••• 65 |
|------------------------|-----|------|------|----------|
| Work people involved | | 10 | | 14,719 |
| Working days lost | 144 | - 00 | | 1,47,989 |

The number of wage earners affected and time loss due to strike activity Maharashtra State during the month of June 1970 have increased as com ared to the previous month.

The figures for the month under review show 65 disputes in progress involving 14,719 workers and a time loss of 1,47,989 mandays as compared to 64 dispute in May 1970 with 14,486 workers affected and a time loss of 1,27,97 mandays.

Twelve of the total disputes in progress during June 1970 were in the Textile Industry, 19 in the Engineering Industry and the remaining 34 were in other industries.

Forty-six of the total disputes involving 10,943 workers were actually recorded during the month while 19 disputes involving 3,776 workers were carried over from the previous month.

The following table gives an analysis of industrial disputes by groups o industries :--

| Industry Group | | Number | of disputes in | n progress | Number of Work-people | Aggregate man-days lost in June 1970 | |
|-------------------|----|---|----------------------------|------------|--|--|--|
| Industry Group | | Started before beginning of June 1970 | Started in June 1970 | Total | involved in all disputes in June 1970 | | |
| 1 | | 2 | 3 | 4 | 5 | 6 | |
| Textile | | 2 | 10 | 12 | 5,813 | 47,784 | |
| Engineering . | | 5 | 14 | 19 | 3,310 | 26,090 | |
| Miscellaneous | | 12 | 22 | 34 | 5,508 | 73,209 | |
| Total, June 1970. | •• | 19 | 46 | 65 | 14,719 | 1,47,989 | |

Seven of the disputes arose over questions of "pay, allowances and 23 related to "retrenchment and grievances about personnel", "to leave and hours of work" and the remaining 11 were to "other"

¹ differences that terminated during the course of the month, 12 ¹ etitled either entirely or partially in favour of the workers 26 in favour the employers while the result of the remaining Seven disputes were inite.

-18----

PROGRESS OF IMPORTANT INDUSTRIAL DISPUTES IN MAHARASHTRA STATE DURING THE MONTH OF JUNF 1970

Bombay

Kamala Mills, Bombay.—About 954 workers from the Weaving departmen of the Kamala Mills, Bombay, struck work from June 11, 1970. protesti against the management for transferring a jobber and his helper from Automatic loom. Due to this strike about 2,746 workers were indirect affected. The strike was in progress till June 22, 1970. The worken resumed duties on June 23, 1970 on the advice given by the union leader of Rashtriya Girni Kamgar Sangh. Due to this strike about 39, mandays were lost.

Ceat Tyres of India Limited, Bombay.—The strike of the 1,018 workers employed in the Ceat Tyres of India Limited, Bombay which started on April 13, 1970 over the workers' demand for discontinuance of Relay system of in Dip Uait section of Textile department was in progress till the end of June 1970 without any material change.

Mukund Iron and Steel Works, Bombay. —Use of the total complement of 2,816 workers employed in the Mukund Iron and steel works, Bombay 127 workers stopped work from May 26, 1970 protesting against the charge sheets given to the workers. 572 workers were indirectly affected. The strike was in progress till the end of June, 1970 without any material change.

Thana

Polyolefins Industries Private Limited, Belapur. -Out of the total complement of 750 workers employed in the Polyolefins Industries Private Limited, Belapur, Thana 600 workers struck work from June 11, 1970 to June 28, 1970, protesting against the order of the termination of services of the worker. The result of the strike was un-successful from the view point of the workers.

CTOBER 1970

ABSENTEEISM STATISTICS FOR THE MONTH OF JULY, 1970

Textile Industry

statistics of absenteeism in the Textile Industry in the State of dabarashtra are compiled from the mills at seven important Textile Centres State, viz., Bombay City, Sholapur, Nagpur, Jalgaon, Akola, Aurangabad ad Nanded.

Returns were received from 70 Mills i.e., 94:59 per cent. of the 74 Mills ported as working at these Centres during July, 1970. The average abseneism in the Textile Industry in these centres amounted to 19:66 per cent. as minst 23:34 per cent. in the previous month.

The following table shows the average percentage of absenteeism at the seven entres for the month of July 1970, on the basis of information for all arcking shifts

| Centres | Numbe | er of Mills | Descentara | | ercentage enteeism |
|------------------|---------|-----------------------|-----------------------------------|--------------|-------------------------|
| Cellues | Working | Furnished information | Percentage col. 3 to col. 2 | June 1970 | July 1970 |
| ' <u>(</u> | 2 | 3 | 4 | 5 | 6 |
| 1. Bombay . | 54 | 52 | 96.30 | 23.72 | 19.01 |
| 2. Sholapur . | 6 | 6 | 100 00 | 20.99 | 28.72 |
| 3, Jaigaon . | 3 | 2 | 6 6 · 6 7 | 12.16 | 11.00 |
| 4. Nagpur | 2 | 2 | 100 00 | 26.96 | 22.86 |
| 5. Akola . | | | | | |
| 6. Aurangabad . | 1 | | 100 00 | 17.24 | 13.39 |
| 7. Nanded | 1 1 | 1 | 100 00 | | 30-53 |
| 8. Other Centres | , 7 | 6 | 85.71 | 18.66 | 13.55 |
| 9. All Centres | 74 | 70 | 94 • 59 | 23.34 | 19.66 |

The Engineering Industry

In the Engineering Industry in Bombay City the average absenteeism in representative Workshops was 19'24 per cent, as against 23'46 per cent.

The percentage of absenteeism in Bombay Port Trust amounted to 17.58 in the Chief Engineer's Department and 24.98 among the monthly paid labourers employed in the Port Trust Docks. The percentage of absenteeism in 5 out of 6 concerns employing more than 500 workers in the States comes to 15.81 per cent.

NIGHT SHIFT IN COTTON MILLS IN BOMBAY CITY

At the beginning of July 1970 there were 53 mills in Bombay City workin night shift and the number of men doing night work was 80,924.

240

LABOUR TURNOVER IN COTTON TEXTILE UNDERTAKINGS FOR JULY 1970

In all 76 Cotton Textile undertakings in Maharashtra State employin, 264,167 workers on an average recorded an average percentage of Labour Turnover of 2.67 for the month of July 1970. The increase employment of Labour (accession) was reported to be 0.97 per cent. Whereas the extent of decrease in employment (separation) registered in the total labour employed in all undertakings was 1.52. The following table indicates the correlation of Labour Turnover with the size of establishments.

LABOUR TURNOVER FOR MAHARASHTRA STATE FOR JULY 1970

| Group | No. of | | Rate per | 100 wor | kers | |
|--------------------|---------|-----------|------------|--------------|--------------------|--------------------|
| | workers | Accession | Separation | Flux | Labour Increase | Labour Decrease |
| Upto 100 | 119 | 15 53 | 15-33 | 30 · 26 | | |
| 101 to 500 | 1,692 | 8 10 | 1.00 | 9 ·10 | 7 · 10 | |
| 501 to 1000 | 2,382 | 0 50 | 1 13 | 1 · 76 | - | 0.63 |
| 1001 to 2000 | 10,202 | 1 00 | 1 · 41 | 2.41 | | 0.41 |
| Over 2000 | 249,773 | 0 92 | 1 · 53 | 2.45 | | 0.61 |
| All Establishments | 264,167 | 0.97 | 1.52 | 2.44 | | 0.55 |

It may be seen that the rate of labour turnover was the highest viz. 30.26 per cent in establishments engaging up to 100 workers, while it was lowest viz. 1.76 per cent in undertakings employing 501 to 1,000 workers.

LABOUR GAZETTE- OCTOBER 1970

table also reveals that with the exception of undertakings employing 100 workers the percentages of separations are negligible among different of establishments.

Considering the labour turnover according to centres, it may be observed the highest rate of labour turnover viz. 7.77 per cent was recorded in the Centres, whereas Dhulia and Jalguon area registered the smallest rate to 85 per cent. The following table indicates percentages of labour mover in cotton textile undertakings in different areas of the State :---

CENTRE-WISE LABOUR TURNOVER FOR JULY 1970

| Custon | | No. of | Rate per 100 workers | | | | | | | | |
|----------------|--------------|-------------------|----------------------|-----------------|--------|--------------------|--------------------|--|--|--|--|
| Centre | | No. of workers | Acces- sion | Separa- tion | Flux | Labour Increase | Labour Decrease | | | | |
| umbay | | 221,515 | 0.97 | 1.54 | 2.51 | | 0.57 | | | | |
| sholapur | | 15,895 | 0.71 | 1 19 | 1 · 90 | | 0.48 | | | | |
| Ohulia & Jalga | 3 n . | 6,722 | 0.43 | 0.42 | 0.85 | 0 01 | | | | | |
| Aurangabad | | 486 | 4-53 | 0.62 | 5 15 | 3.91 | | | | | |
| Nagpur | | 14,503 | 0.53 | 1.23 | 1 · 76 | | 0 70 | | | | |
| Other Centres | | 5,047 | 3.47 | 4.30 | 7 · 77 | | 100.000 | | | | |
| All Centres | | 264,167 | 0.97 | 1 · 52 | 100 | •• | 0.55 | | | | |

regards labour turnover in Bombay City more or less the same trends are noticeable in the State as a whole which could be seen from the following table

LABOUR TURNOVER FOR BOMBAY CITY JULY 1970

| 0.15 | No of | Rate per 100 workers | | | | | | | | |
|--------------------|-------------------|----------------------|-----------------|-------|--------------------|--------------------|--|--|--|--|
| Group | No. of workers | Acces- sion | Separa- tion | Flux | Labour Increase | Labour Decrease | | | | |
| Up to 100 | 86 | 20.93 | 20.93 | 41.86 | | | | | | |
| 101 to 500 | 781 | 11 • 27 | 1.79 | 13 06 | 9.48 | | | | | |
| 501 to 1000 | | | | | | | | | | |
| 1001 to 2000 | 8,802 | 1.05 | 1.44 | 2.49 | | 0.39 | | | | |
| Over 2000 | 2,11,846 | 0.92 | 1.53 | 2-45 | | 0.61 | | | | |
| All Establishments | 2,21,515 | 0.97 | 1.54 | 2.51 | | 0 57 | | | | |

The percentage of labour turnover in establishments engaging upto 10% workers was 41.86 whereas it was only 2.45 in concerns engaging the than 200 workers.

In Sholapur the highest rate of labour turnover of per cent was recorded i mills engaging 501 to 1,000 employees. This can be seen from the following table

LABOUR TURNOVER FOR SHOLAPUR FOR JULY 1970

| No. of | | Rate per 100 workers | | | | | | | |

Cases Under Labour Laws

BEFORE SHRI B. A. EKBOTE, ADDITIONAL COMMISSIONER FOR WORKMEN'S COMPENSATION UNDER THE WORKMEN'S COMPENSATION ACT, BOMBAY

APPLICATION No. 970/C-141 OF 1969.

SIMCA SOMA VERSUS THE SHIPPING CORPORATION OF INDIA LTD., BOMBAY-1.

The Workmen's Compensations Act, 1923—The applicant workers slipped from the gangway staircase, injured and hospitalised. Permanent partial disablement finally assessed at 8 per cent. Claimed compensation on the basis of Medical certificate admitted in evidence by the consent of the parties. Held Medical widence being only opinion evidence would not be decisive of the question of deciding the loss of earning capacity of an injured workman. Diminution or destnction of physical capacity as disclosed by the Medical evidence and the extent which the injured person is thereby disabled from performing the duties which a workman of his class ordinarily performs and from earning the usual remuneration paid for such duties are decisive factors. In view of the re-employment, on the same amount of wages and that too on the work on the Board which is agreed to be made available to the applicant worker till he retires at the age of 60 years, it is held that there is no inability to earn wages as before and the appellant failed to discharge the onus of proving loss of earning capacity and consequently is not entitled to any compensation.

In this application under the Workmen's Compensation Act the applicant Simea Soma claims a lump sum amount of Rs. 1,120 as compensation for personal injury alleged to have been caused to him by accident arising out of and in the course of his employment. The case of the applicant is that he was a workman employed by the Opposite Party as Seacunny on their ship m.v. "Vishva Usha" and that on 19th February 1968 while he was working on the ship he slipped from the gangway staircase and was injured. His left knee Patela was fractured. He was hospitalised at Calcutta for treatment and after some treatment he was repatriated to Bombay on 10th May 1968. He was then treated in St. George's Hospital, Bombay. His permanent partial disability has been finally assessed at 8 per cent. His wages amounted to between Rs. 400 and 500 per month. Applicant states that he is entitled to receive the amount as claimed.

2. Opposite Party denies the claim of the applicant, contending inter alia that this Court has no jurisdiction to hear and entertain the claim of the applicant as his wages exceeded Rs. 500 per month. Opposite Party denies that the applicant suffered permanent partial incapacity to the extent of 8 per cent. as alleged and states that it is certified by the hospital that the applicant is fit for duty as from 18th June 1969. Opposite Party contends that as a matter of fact the applicant has been re-employed on the Opposite Party's ship

m.v. 'Visva Kalyan' with effect from 10th July 1969 without any loss in his emoluments and he continues to work on board the ship. Therefore there remains no loss of earning capacity and this application is not tenable.

3. Following issues have been framed :---

(1) Has this Court no jurisdiction to hear and entertain this application as alleged by Opposite Party ?

(2) Does the applicant prove that he has suffered 8 per cent, permanent partial disability ?

(3) Does he prove that his earning capacity is reduced by 8 per cent. ?(4) What order ?

My findings thereon are as under :---

(1) This Court has jurisdiction.

(2) Yes.

(3) No.

(4) As per final orders.

Reasons

4. Opposite Party's advocate conceded on 17th March 1970, that the wage group of the applicant is between Rs. 400-500 per month and therefore issue No. I has been found in favour of the applicant. On 29th June 1970 applicant's advocate admitted that the applicant is re-employed for the second time on the same amount of wages and he made a statement from the Bar that the applicant will continue to work till he completes 60 years. By consent of parties medical certificate issued by St. George's Hospital has been exhibited. A medical certificate is evidence when both parties agree to it being received in evidence. Applicant proves that he has suffered permanent partial disability to the extent of 8 per cent. Although the physical disability of the applicant is assessed at 8 per cent. Opposite Party disputes that the earning capacity of the applicant is reduced and it is contended that if there is no evidence of loss of earning capacity the applicant is not entilled to any compensation.

5. Applicant has failed to go into the witness box and he has not led any other evidence except the medical certificate. His advocate stated that the applicant was re-employed for the second time and he proceeded to argue the case as no evidence was considered necessary in view of the fact that the medical certificate was admitted in evidence by consent of parties. Now the learned advocate of the applicant mainly relies on the medical certificate in support of the claim of the applicant. Reliance is also placed on the Authority 1969 Labour and Industrial cases 971 = A.I.R. 1959 Cal. 378 (Calcutta Licensed Measurers Bengal Chamber of Commerce v. Md. Hussain).

6. It is held in 1957 Cal. 601 that the Workmen's Compensation Act regards a person only as a wage earner, and is concerned not with any physical pain or suffering or disfigurement to which a workman might be subjected by accident, but only with the loss of power to earn wages resulting from the injury. 1936 All 493 lays down that while assessing the compensation in the case

LABOUR GAZETTE- OCTOBER 1970

259

a permanent partial disablement what the Court has got to see the fact as to whether the earning capacity of the workman has reduced in every employment which he was capable of underting at the time of accident and not merely the particular employwith in which he was engaged at the time of accident resulting in the ablement. The Workmen's Compensation Act lays down the principles which the compensation is to be computed after a claim has been established. the compensation is for loss of earning and the loss of earning has reference futurity. When the Authority awards compensation to a workman on the yound of partial or complete disability it does so on the basis that in future workman would not be in a position to earn at the old rate or earn anything all. See 1956 I LL.J. Cal. 26 (Satya Juga v. B. Chatterjee). Under the ratute the measure of compensation to be awarded to an injured workman respect of his injury is the difference between what he earned prior to the reident and what he is earning or able to earn in some suitable employment fer the accident. Award of compesation cannot be based on mere surmises r conjectures, nor guess can take the place of inference or presumption. Applicant has to prove loss of earning capacity as a matter of fact. If there is to other evidence of loss of earning capacity then the applicant is not entitled in any compensation merely on the basis of medical certificate, because a medical certificate is only a statement of doctor's view as to the injuries and isability. It is not a proof of incapacity to earn. The jurisdiction to decide the loss of earning capacity of an injured workman is with the Commissioner. Medical evidence, being only opinion evidence, would not be decisive of the question and the Commissioner has to independently give a finding as to the tent of the loss of earning capacity. A finding as to incapacity or the extent of incapacity to earn can not be founded upon mere medical certificate. The artificate of the Medical Expert can only say about the physical incapacity of the man and not about his loss of capacity to earn. 1968 ACJ. 270 Cal. (Electric supply Corporation Ltd. v. Habur Chandra Das) lays down that no compensation can be granted for any physical disability unless there is loss of earning capacity. It is only in the case of Scheduled injury that such loss of earning is presumed. Where the injury is of a type not specified in the Schedule the workman must prove the loss of earning capacity, if any, as a matter of fact. It must be proved by evidence which establishes that the workman, as a result of the injury, is unable to earn as much as he did before. This is a question of fact and has to be proved by evidence like any other question of fact. It is also held in A.I.R. 1967 Cal. 7 (Commissioner for the Port of Calcutta v. Prayagram) that loss of earning capacity is quite different from loss of physical apacity. The loss of earning capacity is an issue of fact which must be proved by evidence of physical injury resulting in a loss of earning capacity. This issue cannot be decided upon medical evidence only. The loss of earning apacity is not co-extensive with the loss of physical capacity and certainly the former does not prove the latter. In the case 1968 11 LL.J. 393 Cal. there was mevidence about the loss of earning capacity and it was held that the applicant was not entitled to receive compensation. The liability to pay compensation that by reason of the harm caused to his bodily system by the accident his earning capacity has been affected. The substance of the medical evidence as to the

nature and measure of the physical infirmity has to be applied in the of the loss of earning capacity as one of the factors and perhaps factor. The loss of earning capacity or the extent of it has got to be by taking into account the diminution or destruction of physical disclosed by the medical evidence and then it is to be seen to what diminution or destruction could reasonably to be taken to have affected person from performing the duties which a workman f ordinarily performed and from earning the normal remuneration part duties. In number of cases inspite of physical injury and the effect will be no loss of earning capacity. The present case is one of such It is an admitted fact that the applicant has been re-employed twice amount of wages to work on hoard the ship and there is a statement of the ! advocate of the applicant that the applicant will continue to work till h at the age of 60 years without any loss of earning in future. The accid not the effect of removing the applicant from one class of work to ann The onus was on the applicant to prove that he is not able to get much as Rs. 400-500 per month, the amount he carned at the time of accident, by reason of the injury sustained. He does not even suggest he could not get work for the same amount of wages owing to his in-On the contrary he admits that the work is available to him till he retires there is no reduction in his monthly wages. There are no changes circumstances peculiar to this man. Before he is employed on board ship he has to undergo medical examination and twice he was found for undertake the same work on board the ship and was re-employed and continue to work as such. There is no evidence on record to show that dependently of the present employers the applicant is not able to earn same amount of wages on account of the injury. In the case of disablement of a permanent nature the reduction of earning capacity is spoken with rem to every employment in which the workman is capable of undertaking at time of accident. The object of the Workmen's Compensation Act is to a incapacitates him from giving his living. Compensation given by the is not a compensation for the injury but a compensation for the consequent resulting from the injury, such consequences disclosing themselves in the fi of inability to earn wages due to the injury sustained. The consequences whi ability to earn wages due to the injury sustained. In the present case there is no inability to earn wages as before. The words 'inability to earn wages due to the injury' are the key note of the measure of the compensation n coverable. Inability to carn is inability to get employment owing to some incapacity to, work personal to the workman. I have already said above that the same employment is available to the applicant till the date of his retirement at the age of 60 years and as such there is no question of inability to earn wage by the applicant. The rules laid down appear to be that the workman is entitled to compensation if the accident disables him from earning wages such as he was

LABOUR GAZETTE-OCTOBER 1970

261

time. In other words compensation which the workman is entitled to w that which is to be apportioned to his injury in a normal market. No evidence reled in this case to show that the applicant has suffered any loss of earnings reason of his injury, nor there is any reasonable probability shown that the activative would ensure in future. There is no evidence to establish definitely but applicant's chance of earning is not equal to what he would have earned there had been no accident, and in the absence of any such evidence we anot say that the earning capacity of the applicant has been reduced on par with his physical disability assessed by the hospital. The governing principles ye (a) whether the man's disability prevents him from following the calling and whether it prevents him from getting employment outside his calling for amount of wages. This is a case of non-scheduled injury and in the workman is reduced to the extent of his pyhsical incapacity assessed by the doctor. Applicant has failed to discharge the onus which heavily lay on him to establish loss of his earning capacity to the extent of 8 per cent. It is not a matter of course at all that whenever a man has received an injury of a permanent partial character it should necessarily follow an award of compensation on the basis of the physical disability assessed by the doctor. be proved by evidence as a matter of fact.

7. The authority relied upon by the learned advocate of the applicant viz. 1969 Lab. 1.C. 971 = A.I.R. 1969 Cal. 378 is not on all its fours with the present case. That aethority also lays down that loss of earning capacity or extent of it is a question of fact and the case reported in A.I.R. 1957 Cal 660, Kalidas Ghosal v. S. K. Mondal, has been followed. It does not lay down as a principle that even in a case of non-scheduled injury of a permanent partial character it is presumed or that the medical evidence should be taken as a prima facie proof of the fact that the injured person's earning capacity has been reduced to the extent of his physical disability in every employment which he was capable of undertaking at the time of the accident. On the material before me 1 hold that applicant's earning capacity has not been reduced by 8 per cent, or to any extent and therefore he is not entitled to receive any compensation from the Opposite Party. Hence,

Order

Aplication is dismissed. Applicant to pay Rs. 25 as costs to Opposite Party within 15 days.

Bombay : Dated 18th August 1970.

LABOUR GAZETTE-OCTOBER 1970

nature and measure of the physical infirmity has to be applied in the assessment of the loss of earning capacity as one of the factors and perhaps the principal factor. The loss of earning capacity or the extent of it has got to be determined by taking into account the diminution or destruction of physical capacity as disclosed by the medical evidence and then it is to be seen to what extent such diminution or destruction could reasonably to be taken to have disabled the affected person from performing the duties which a workman of his class ordinarily performed and from earning the normal remuneration paid for such duties. In number of cases inspite of physical injury and the effect of it there will be no loss of earning capacity. The present case is one of such instances It is an admitted fact that the applicant has been re-employed twice on the same amount of wages to work on hoard the ship and there is a statement of the learned advocate of the applicant that the applicant will continue to work till he retires at the age of 60 years without any loss of earning in future. The accident has not the effect of removing the applicant from one class of work to another. The onus was on the applicant to prove that he is not able to get as much as Rs. 400-500 per month, the amount he earned at the time of the accident, by reason of the injury sustained. He does not even suggest that he could not get work for the same amount of wages owing to his injury. On the contrary he admits that the work is available to him till he retires and there is no reduction in his monthly wages. There are no changes in circumstances peculiar to this man. Before he is employed on board the ship he has to undergo medical examination and twice he was found fit to undertake the same work on board the ship and was re-employed and will continue to work as such. There is no evidence on record to show that independently of the present employers the applicant is not able to earn the same amount of wages on account of the injury. In the case of disablement of a permanent nature the reduction of earning capacity is spoken with regard to every employment in which the workman is capable of undertaking at the time of accident. The object of the Workmen's Compensation Act is to give an injured workman a livelihood so long as the injury arising from the accident incapacitates him from giving his living. Compensation given by the Act is not a compensation for the injury but a compensation for the consequences resulting from the injury, such consequences disclosing themselves in the form of inability to earn wages due to the injury sustained. The consequences which ability to earn wages due to the injury sustained. In the present case there is no inchility to earn wages as before. The words 'inability to earn wages due to the injury' are the key note of the measure of the compensation recoverable. Inability to earn is inability to get employment owing to some incapacity to, work personal to the workman. I have already said above that the same employment is available to the applicant till the date of his retirement by the applicant. The rules laid down appear to be that the workman is entitled to compensation if the accident disables him from earning wages such as he was capable of earning previously to the accident, that the compensation is to be measured by the disability that is due to the injury sustained, and that compensation to be turned into money value according to the state of normal market at

In other words compensation which the workman is entitled to apportioned to his injury in a normal market. No evidence the apportioned to his injury in a normal market. No evidence applicant has suffered any loss of earnings injury, nor there is any reasonable probability shown that the charce of earning is not equal to what he would have earned is had been no accident, and in the absence of any such evidence we had been no accident, and in the applicant has been reduced on par his physical disability assessed by the hospital. The governing principles whether the man's disability prevents him from following the calling and another it prevents him from getting employment outside his calling for ame amount of wages. This is a case of non-scheduled injury and in the of a non-scheduled injury there is no presumption that the earning capacity

by the doctor. Applicant has failed to discharge the onus which ity lay on him to establish loss of his earning capacity to the extent of frient. It is not a matter of course at all that whenever a man has received gury of a permanent partial character it should necessarily follow an award compensation on the basis of the physical disability assessed by the doctor. issue of reduction in the earning capacity being a question of fact has to avoid by evidence as a matter of fact.

The authority relied upon by the learned advocate of the applicant 1969 Lab. I.C. 971 = A.I.R. 1969 Cal. 378 is not on all its fours with the resent case. That authority also lays down that loss of earning capacity or ident of it is a question of fact and the case reported in A.I.R. 1957 Cal 660, puldas Ghosal v. S. K. Mondal, has been followed. It does not lay down as insuciple that even in a case of non-scheduled injury of a permanent partial earacter it is presumed or that the medical evidence should be taken as a

part educed to the extent of his physical disability in every employment which was capable of undertaking at the time of the accident. On the material was me I hold that applicant's earning capacity has not been reduced by per cent. or to any extent and therefore he is not entitled to receive any comparation from the Opposite Party. Hence,

LABOUR GAZET

VOL. L

No. 3

NOVEMBER 1970

SINGLE COPY Rs. 1.25 ANNUAL SUBSCRIPTION Rs. 12

ISSUED MONTHLY BY THE OFFICE OF THE COMMISSIONER OF LABOR AND DIRECTOR OF EMPLOYMENT GOVERNMENT OF MAHARASHTRA

LABOUR GAZETTE

Started in 1921, the Lebour Gazette, issued monthly, is a journal for the use of all interested in obtaining prompt and accurate information on matter specially affecting labour in India and abroad. It contains statistical and other information on consumer price index numbers for working class, indutrial disputes, absenteeism, trade unions, industrial relations, cases under labour laws, glimpses of industrial awards, labour legislation, etc. Special articles embodying results of enquiries and res arch relating to wages, hour of work, unemployment, family budgets, etc., are published from time to time

Annual subscription for the year Sept. 1970—Aug. 1971 is being accepted at Rs. 12.

All amounts are payable in advance in Bombay, in full, either by M. 0 or Cheques/Drafts drawn on Bombay Banks.

ALL CORRESPONDENCE AND REMITTANCES SHOULD BE ADDRESSED TO:

The Commissioner of Labour and Director of Employment, "Commerce Centre", Tardeo, Bombay-34 : WB (India).
